MODERN PINK PAPER · STEP-BY-STEP GUIDE

How to make and send a customer proof

Some customers want to see a picture of their card before we print it. That picture is called a proof. This guide shows every click, from the Shopify order list to the proof email going out. Read each step. Do each click. Do not skip any step.

Made from: Arantza's screen recording "auto proofs", Oct 19, 2026, 9:37 AM to 9:43 AM, and her activity log

Example order: #7697, Engagement Party invitations, set of 75

How to use this guide

- **Go in order.** Do Step 1, then Step 2, and so on.
- **Every small step has a number**, like 2.4. Do one small step at a time.
- **The red circle in a picture is where to click.** The red label next to it names what was clicked.
- **Your screen may look a little different.** That is okay. If it looks very different, or you get a message you do not understand, **stop and ask Dalia**.
- **Words in bold** are names you will see on the screen. `Words like this` are things you type. Type them exactly.
- A box that says **NO PICTURE** means the recording did not show that click on screen. The words come from Arantza's activity log.

Before you start

- A Windows computer with **Google Drive for desktop**.
- **Chrome**, signed in to **Shopify** (store: modern-pink-paper1) and to Dalia's **Gmail**.
- **Adobe InDesign CC 2018**, with the script **MPP - MAKE PROOFS** in the Scripts panel.
- The pink **MPP proof buttons** in Chrome. They show on the Shopify Orders page (**MAKE PROOFS**, **Proof Report**) and along the bottom of each order page

(**PROOF PANEL**, **ATTACH PROOF**, and more). They come from a Chrome add-on.

- The **MPP Opener**. The **OPEN IN INDESIGN** and **OPEN** buttons only work if it is installed on your PC.
- **Microsoft Teams**, to talk to the team.

> **PASSWORDS**
>
> No passwords are written in this guide on purpose. Ask Dalia for any login you do not have.

Words to know

Proof	A picture of the card that we send to the customer to approve before we print.
Blocked	The tool did not make this proof by itself. A person has to look at the order first. Blocked orders have a red stop sign in the Chrome tab name.
Override	You tell the tool, "Make the proof anyway." You do this by ticking the box next to the order.
INDD	An InDesign file. You can edit it.
JPG	A flat picture of the card. This is what the customer sees. You cannot edit it.
RA	Return address. It is a second file with the buyer's return address.
Script	A small program that runs inside InDesign. It does a lot of clicks for you.
Order Info	The white box on the side of the design. It lists what the customer typed.

The 7 steps at a glance

1 **Start the proof tool**
Click MAKE PROOFS on the Shopify orders list.

2 **Send the order to InDesign**
Tick the order and click SEND TO INDESIGN.

3 **Run the script in InDesign**
The script builds the card for you.

4 **Check and fix the card**
Do what the STOP page says. Check the details.

5 **Save and export**
Save both files. Export them as pictures.

6 **Attach the pictures to an email**
Open the Proof Panel and send the ticked pictures to Gmail.

7 **Send the email**

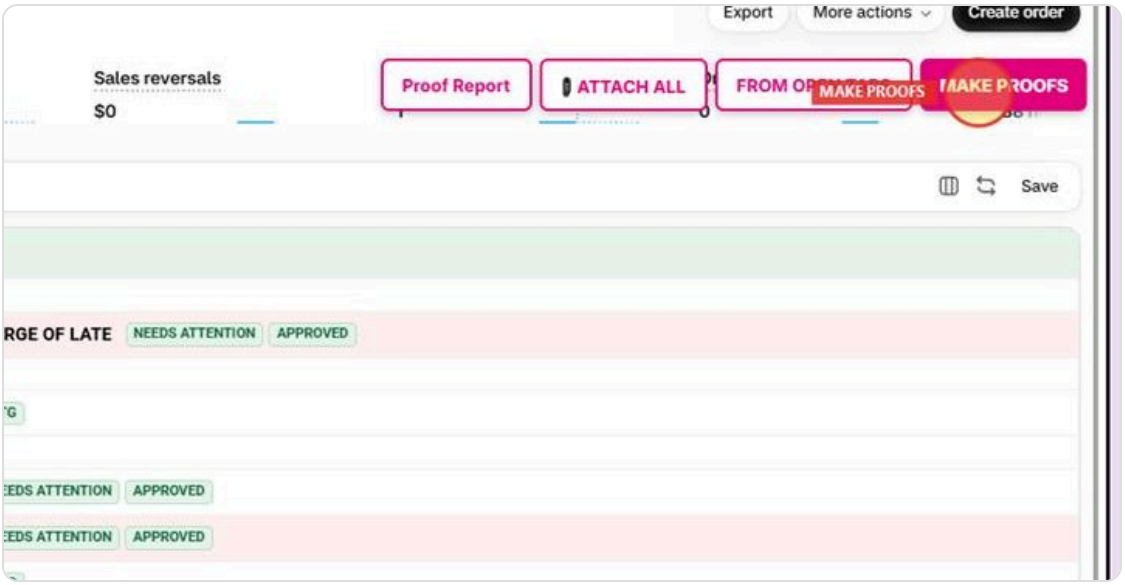

Read it, add words if you need to, and click Send.

1 Start the proof tool

You do this on the Shopify orders list.

1.1 In Chrome, open the Shopify tab named **Modern Pink Paper · Orders**. The page should show your **unfulfilled** orders.

1.2 Find the big pink button in the top right called **MAKE PROOFS**. Click it.

Click **MAKE PROOFS**.

1.3 A pink box called **Proof Report** opens on the right. It checks every order on the page. Read it. It tells you three things:

- **READY FOR INDESIGN**: orders the tool can make by itself.
- **BLOCKED — NO PROOF MADE**: orders a person must look at. Each one has a red reason under it. In the picture, **#7698** says "SKU (custom) needs a human". **#7697** says the customer wrote in the Notes box and in Additional Notes.
- A small line at the top says how many orders it checked. In the picture: it checked 11 orders. 2 asked for a proof. 3 already had one. 6 did not need one.

GOOD TO KNOW

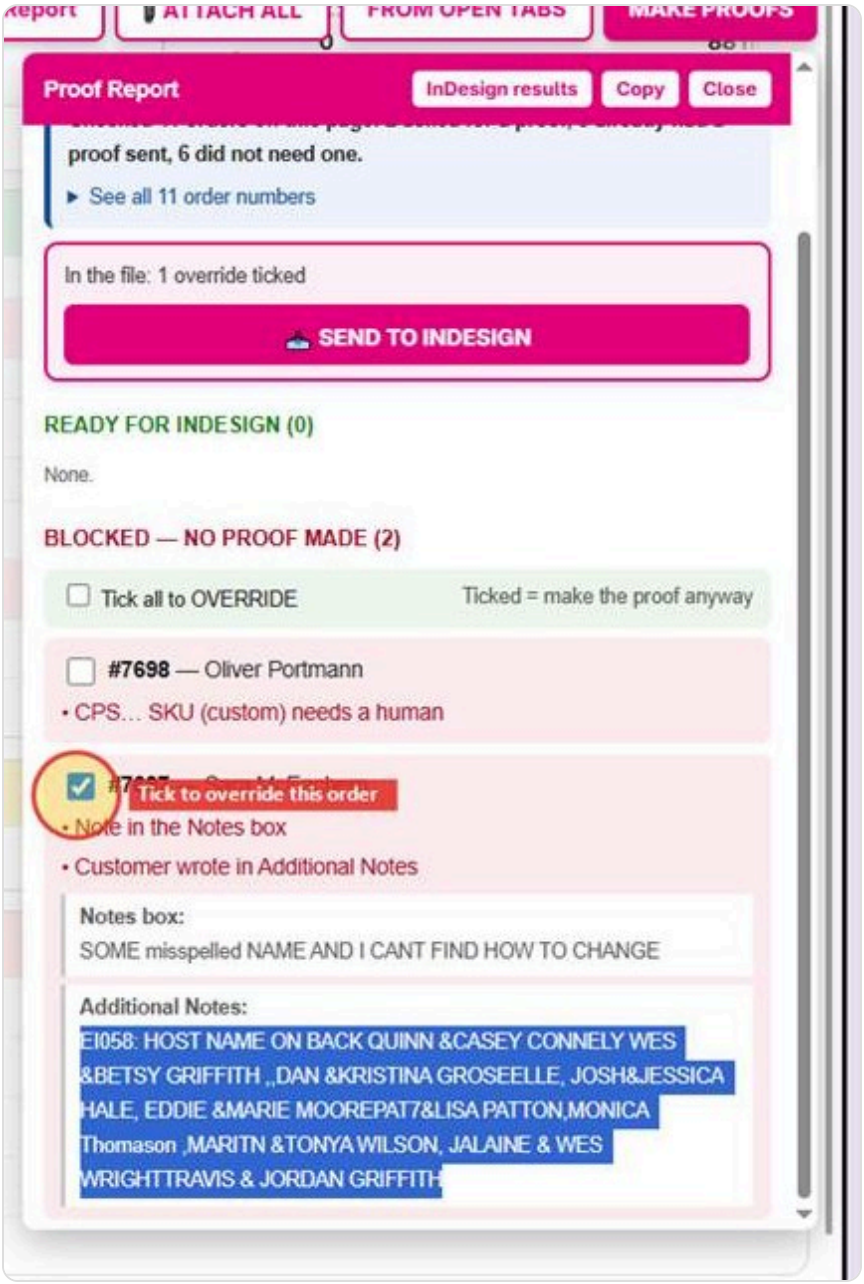

You only need to make a proof for orders where the customer asked, **"Do you want to see a proof before we print?": Yes**. The tool finds those for you.

2 Send the order to InDesign

If an order is blocked, you must tell the tool to make it anyway.

Do this step only for a blocked order that you have read and decided to make. If the order shows under **READY FOR INDESIGN**, you do not need to tick anything. Go to 2.3.

2.1 In the **Proof Report** box, find the order you want. Click the small **box** next to its number so a check mark shows. The red label says **Tick to override this order**.

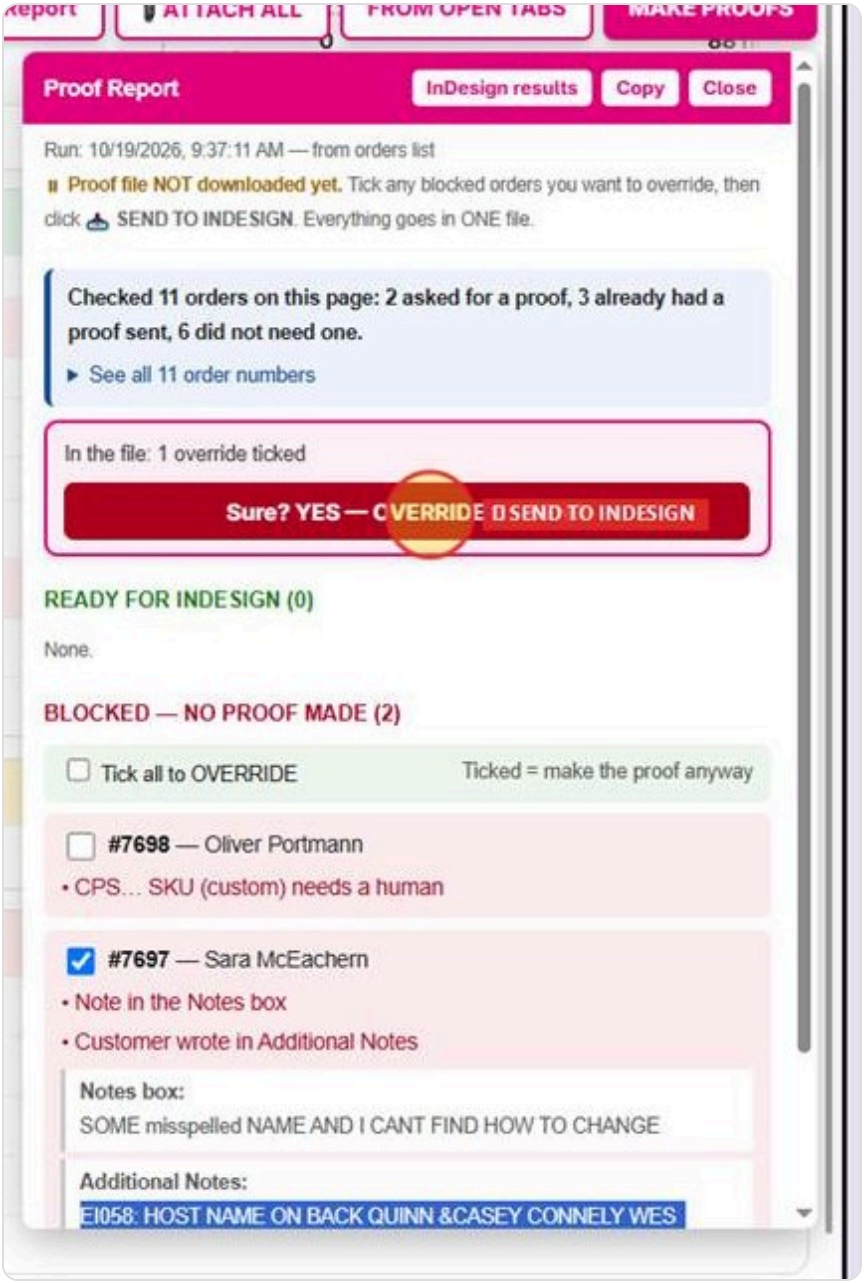

Tick the box next to the order.

The pink area at the top now says **In the file: 1 override ticked**.

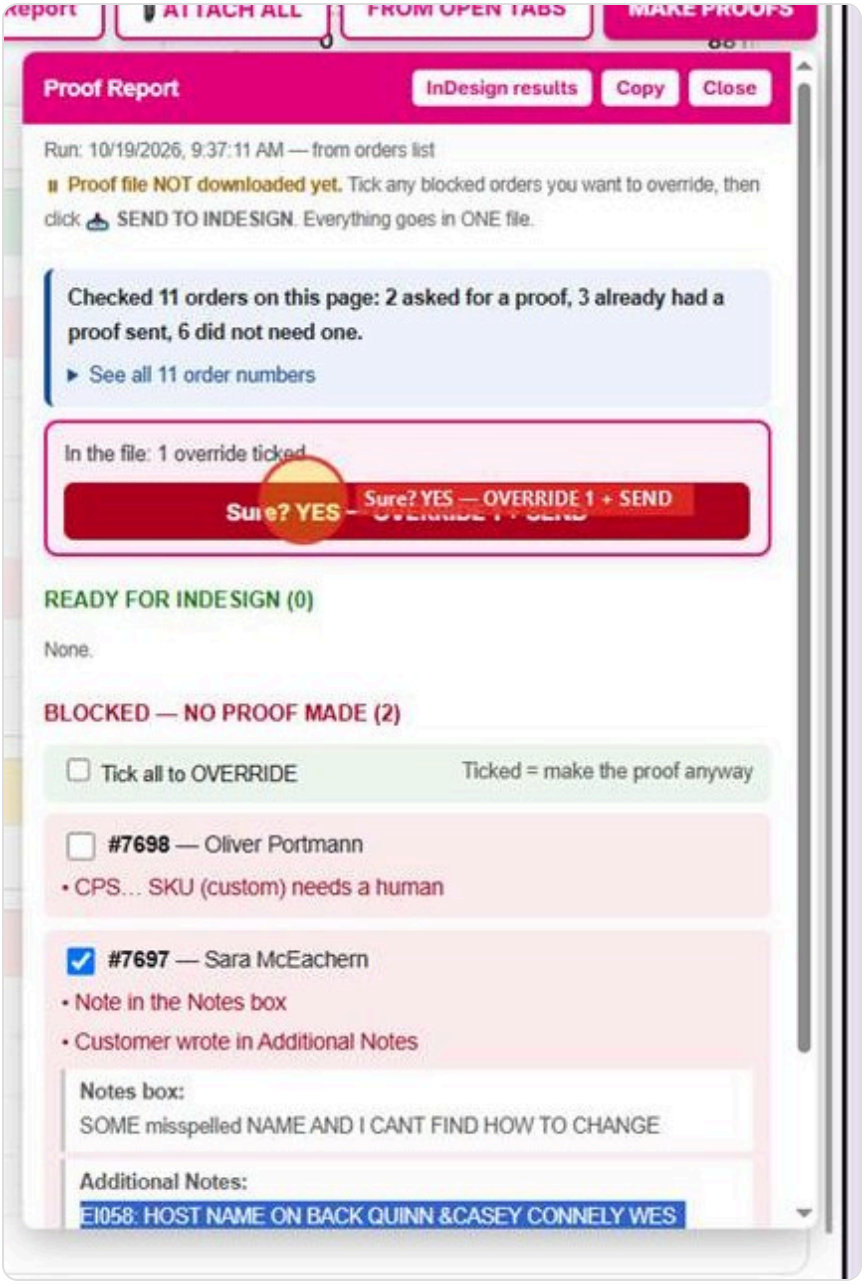

2.2 Read what the customer wrote in the **Notes box** and **Additional Notes**. In this order, the customer wrote a long list of host names for the back of the card. They also said, "SOME misspelled NAME AND I CANT FIND HOW TO CHANGE". You will need this in Step 4.

2.3 Click the pink button **SEND TO INDESIGN**.

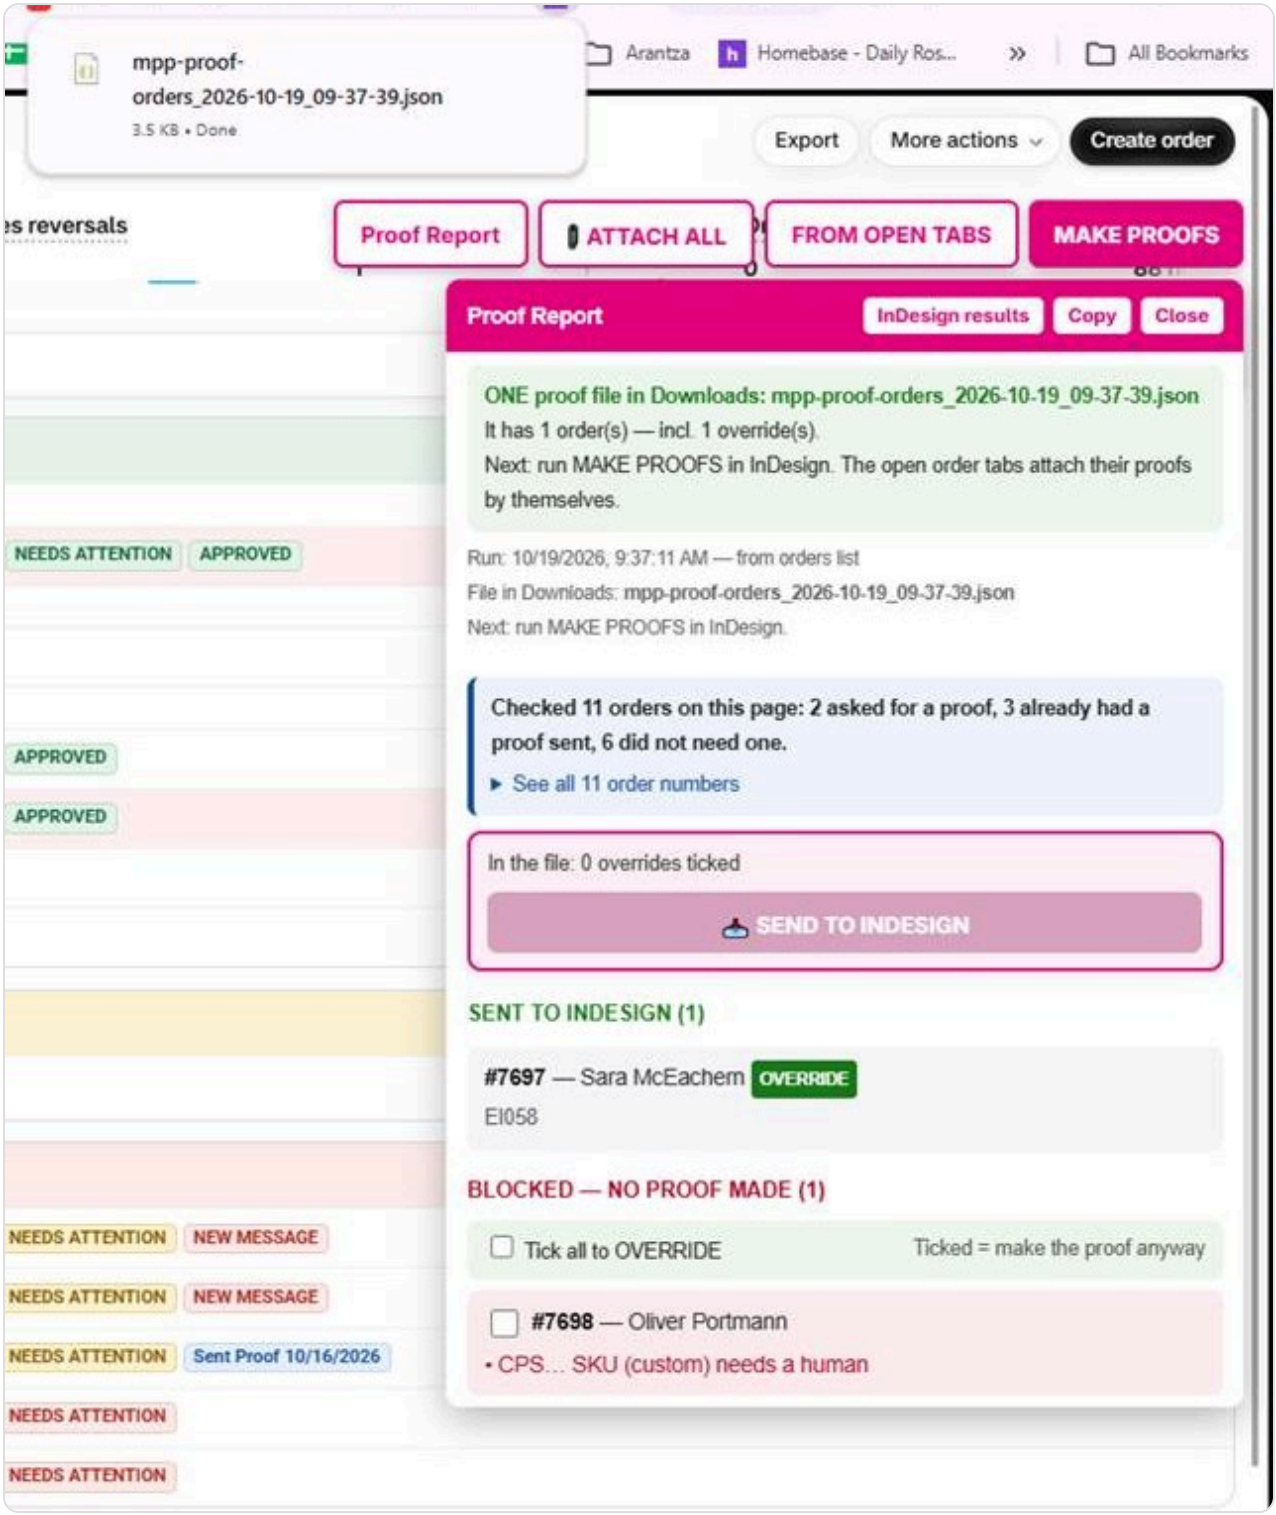

Click **SEND TO INDESIGN**.

2.4 The button turns red and asks **Sure?**. If you ticked an override, it says **Sure? YES — OVERRIDE 1 + SEND**. Click it.

Click **YES — OVERRIDE 1 + SEND**.

2.5 Chrome saves a small file in your **Downloads** folder. It is named like `mpp-proof-orders_2026-10-19_09-37-39.json`. You do not open it. InDesign reads it.

The file is saved. The report now says **SENT TO INDESIGN (1)**. It also says: "Next: run MAKE PROOFS in InDesign."

Check:

- The Proof Report says **ONE proof file in Downloads**.
- Your order is listed under **SENT TO INDESIGN**.

3 Run the script in InDesign

The script builds the card from the order for you.

3.1 Click the **Adobe InDesign CC 2018** icon on the taskbar at the bottom of the screen. Wait. InDesign takes about 20 seconds to open if it was closed.

In Arantza's recording, InDesign was closed. She clicked its icon at 9:37:42. It was ready at about 9:38:18.

3.2 Look for the small **Scripts** panel on the left. If you do not see it, click **Window**, then **Utilities**, then **Scripts**.

NO PICTURE The recording does not show this panel being opened. It was already open on her screen.

3.3 In the Scripts panel, open the folder **User**. Open the folder **Customer Service**. **Double-click** the script named **MPP - MAKE PROOFS v0.9.2 - October 2nd**.

(The version name may be different on your screen. It always begins with **MPP - MAKE PROOFS**.)

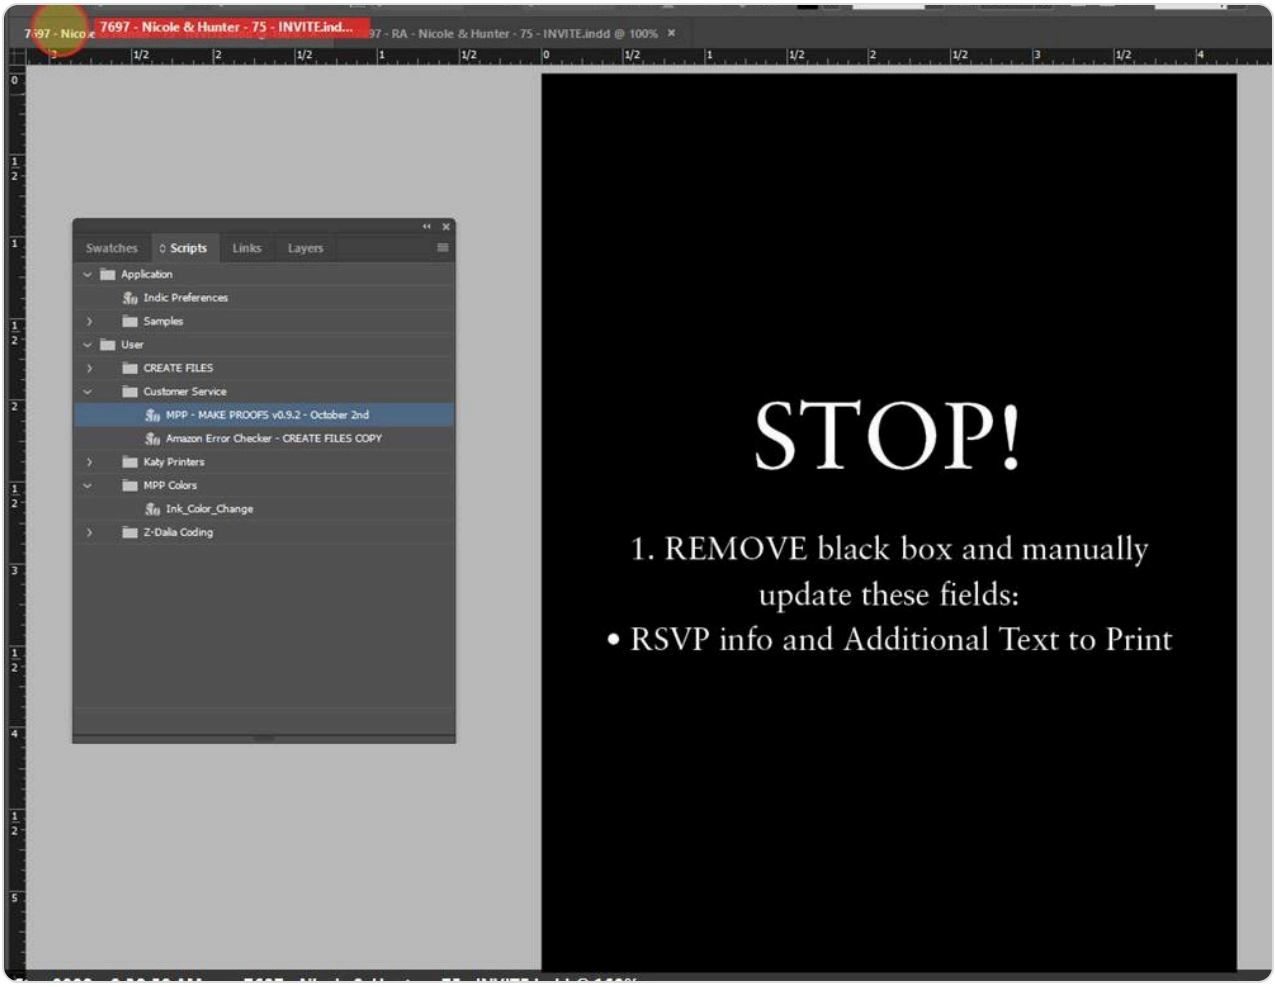

NO PICTURE The recording does not show the double-click. The picture in step 3.5 shows the Scripts panel with this script highlighted.

3.4 Wait a few seconds. A small **Script Alert** box may pop up. Notepad also opens a window named **PROOF REPORT**. It lists what the script did. Read it. Then click back to InDesign.

NO PICTURE This comes from the activity log. The log shows a Script Alert window and a Notepad window called "PROOF REPORT - 09-38-52" at 9:38:52.

3.5

The script opens a new card file. Its name starts with the order number, like **7697 - Nicole & Hunter - 75 - INVITE.indd**. It also makes a second file for the return address: **7697 - RA - Nicole & Hunter - 75 - INVITE.indd**. Click the tab at the top of the window to switch between files.

The new file. The red circle is on the tab. The Scripts panel on the left shows the script that was run.

4 Check and fix the card

Do not skip this. The script cannot do everything. Look at every part.

4.1 If you see a **black page** with the word **STOP!**, read it. In this order it says:

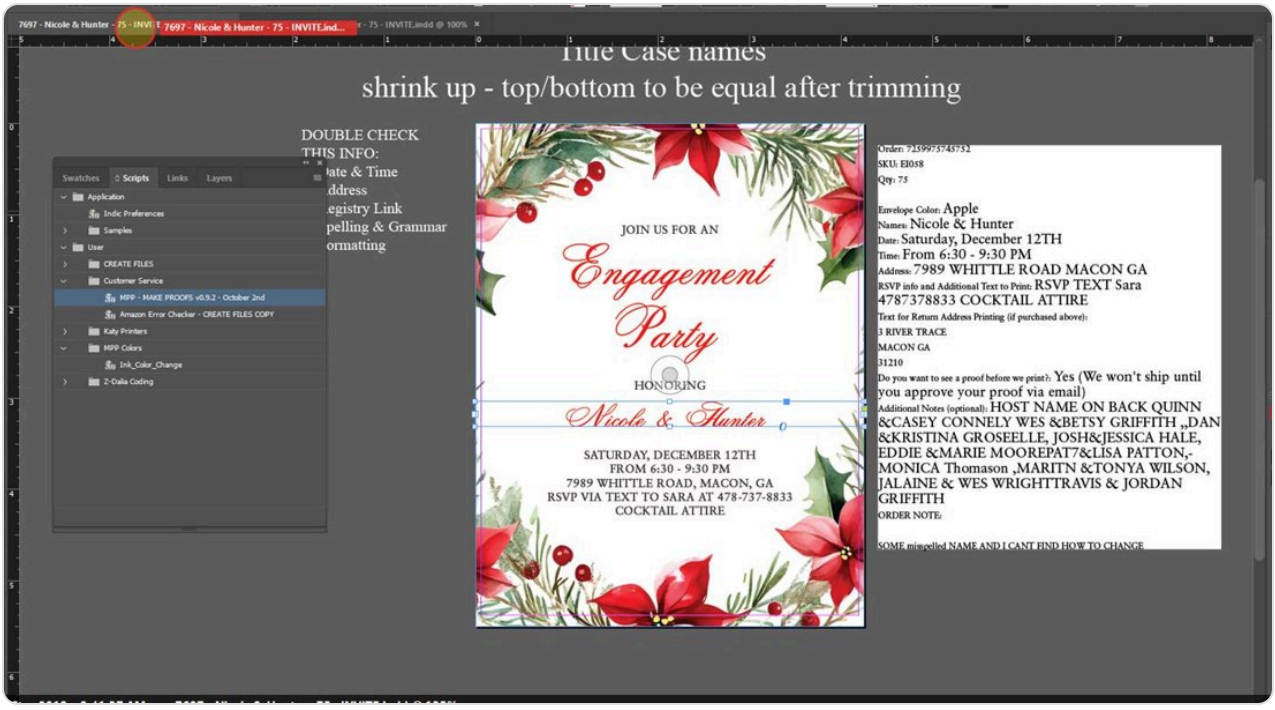

- "1. REMOVE black box and manually update these fields:"
- "• RSVP info and Additional Text to Print"

This means the script could not fit some of the customer's words. You must type them in yourself. Delete the black box when you are done.

4.2 Look at the white box on the side of the card. It is called **Order Info**. It shows what the customer typed: names, date, time, address, RSVP, and notes. Use it to fill in the card.

4.3 Read the notes in the gray area next to the card. They are reminders for you:

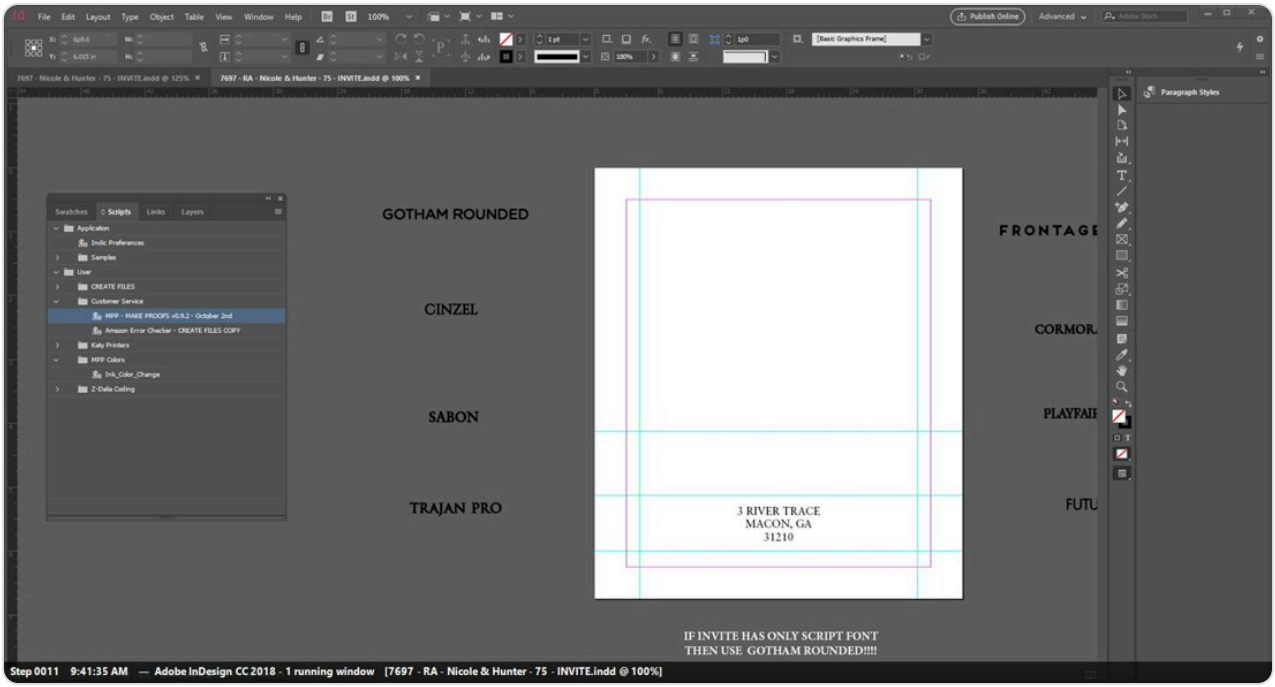

- **Title Case names.** Write names with a capital letter at the start of each word.
- **Shrink up.** The space at the top and bottom should be equal after trimming.
- **DOUBLE CHECK THIS INFO:** date and time, address, registry link, spelling and grammar, and formatting.

The card after Arantza fixed it. The Order Info box is on the right. The reminders are at the top left.

4.4 Click the tab for the **RA** file. Look at the return address. In the picture, the return address is at the bottom of the page. The gray area has this rule:

> **RULE ON THE PAGE**
>
> **IF INVITE HAS ONLY SCRIPT FONT, THEN USE GOTHAM ROUNDED!!!!**

The return address file. It shows a font list.

4.5 If you must change words, use the **Type tool** (the big **T** in the toolbar on the right). Click inside the text. Type the new words.

NO PICTURE The activity log did not capture what Arantza typed in the card. The recording shows the finished card at 9:41 AM, about 2.5 minutes after the script ran.

4.6 If the customer wrote something you cannot do (like a misspelled name you cannot find), do not guess. Make the best proof you can. Then tell the customer in the email (Step 7), or ask Dalia.

Check:

- The black STOP box is gone.
- Names, date, time, and address match the Order Info box.
- Names are in Title Case. The spelling is right.
- If the customer asked for a return address, the RA file is done too.

5 Save and export

Save both files. Then make a picture of each one.

NO PICTURE The recording took no pictures of the Save and Export boxes. These steps come from Arantza's activity log.

5.1 Click the tab of the card file. Choose **File**, then **Save As**. In the **File name** box type the name with the order number, like `7697 - Nicole & Hunter - 75 - INVITE`. Click **Save**.

5.2 Click the tab of the RA file. Choose **File**, then **Save As**. Type the name, like `7697 - RA - Nicole & Hunter - 75 - INVITE`. Click **Save**.

5.3 Now make the pictures. Click the card tab. Choose **File**, then **Export**. Type the same file name as above. Make the file type **JPEG**. Click **Save**. Click **Export** if a second box opens.

Do the same for the RA file.

You should end up with **two JPG pictures**: one for the card and one for the return address. Each JPG has the same name as its INDD file.

Check:

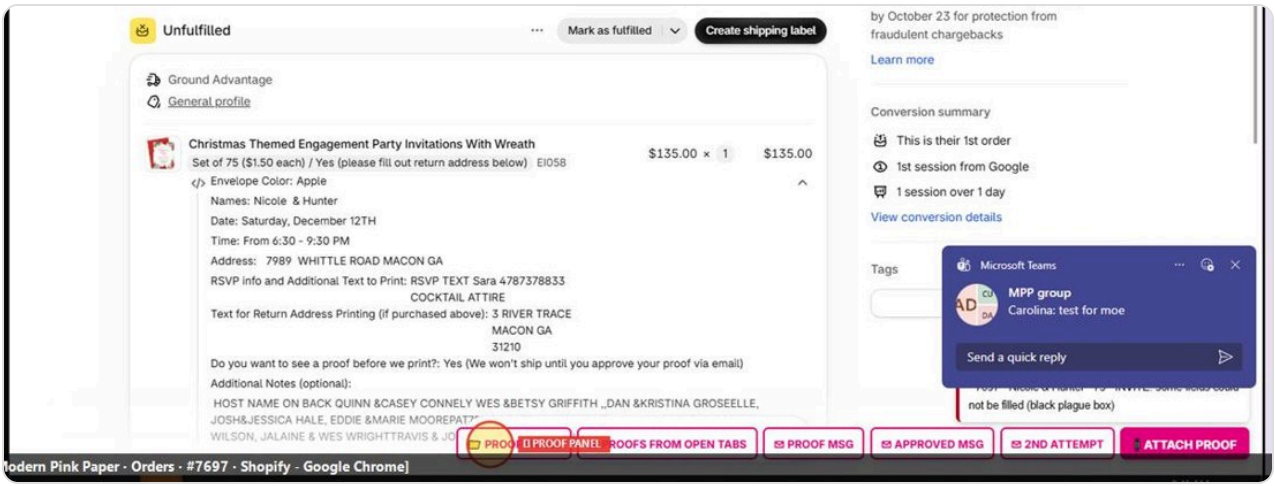

- You have 2 InDesign files and 2 JPG pictures for this order.
- Each name starts with the order number.

6 Attach the pictures to an email

You do this on the order page in Shopify.

6.1 Click the **Google Chrome** icon on the taskbar. If it shows a few windows, click the one for this order. Its tab starts with ⛔ **BLOCKED · … · #7697**. (The red stop sign stays on blocked orders. That is normal.)

6.2 Look at the pink buttons along the **bottom** of the page. Click **PROOF PANEL**.

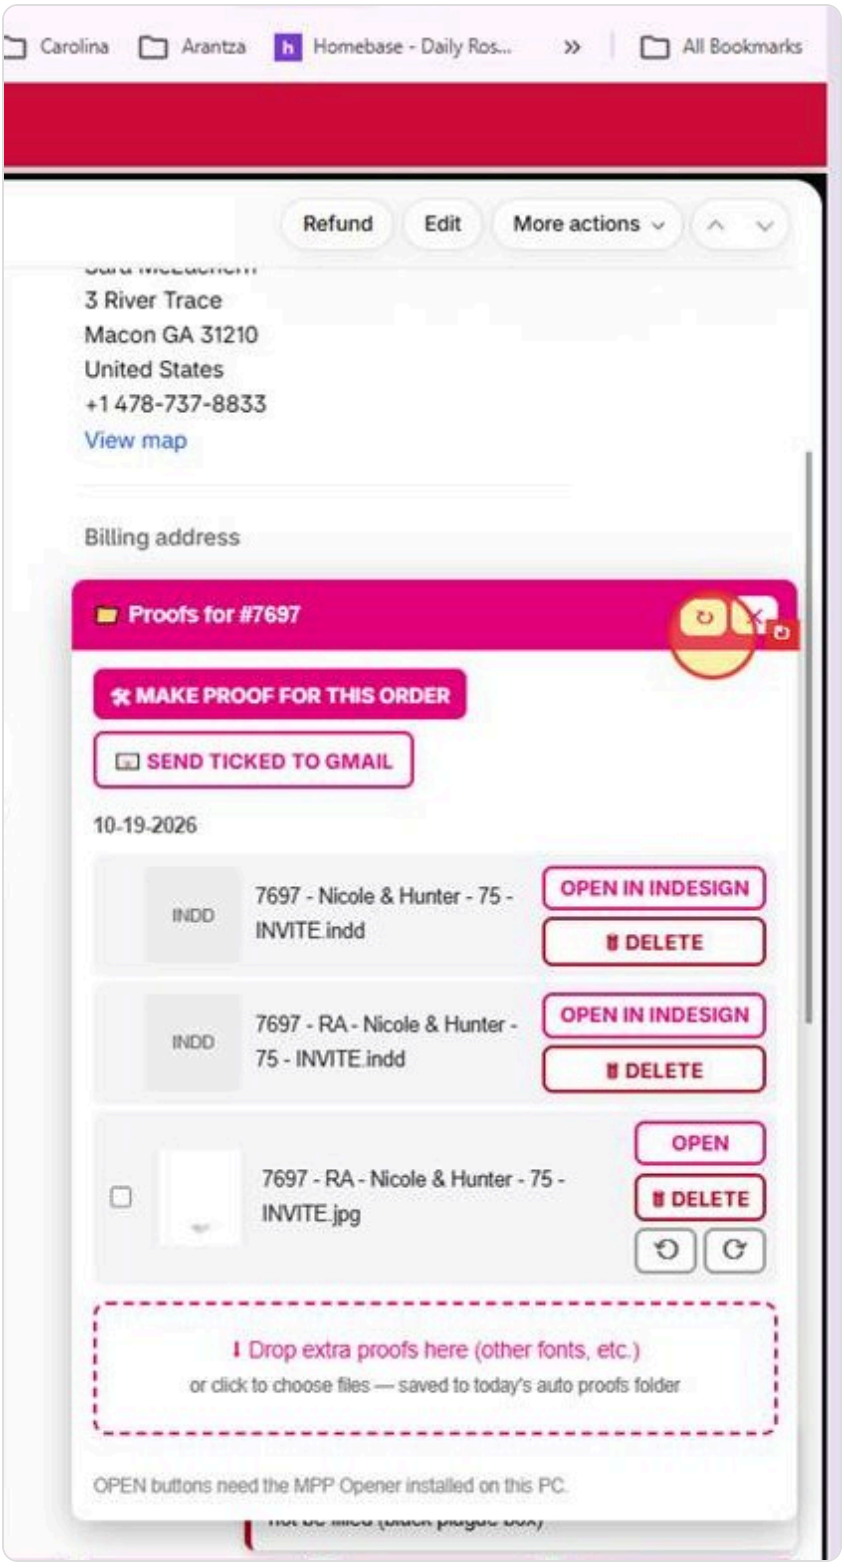

Click **PROOF PANEL**. The other pink buttons are used in later steps by the team.

6.3

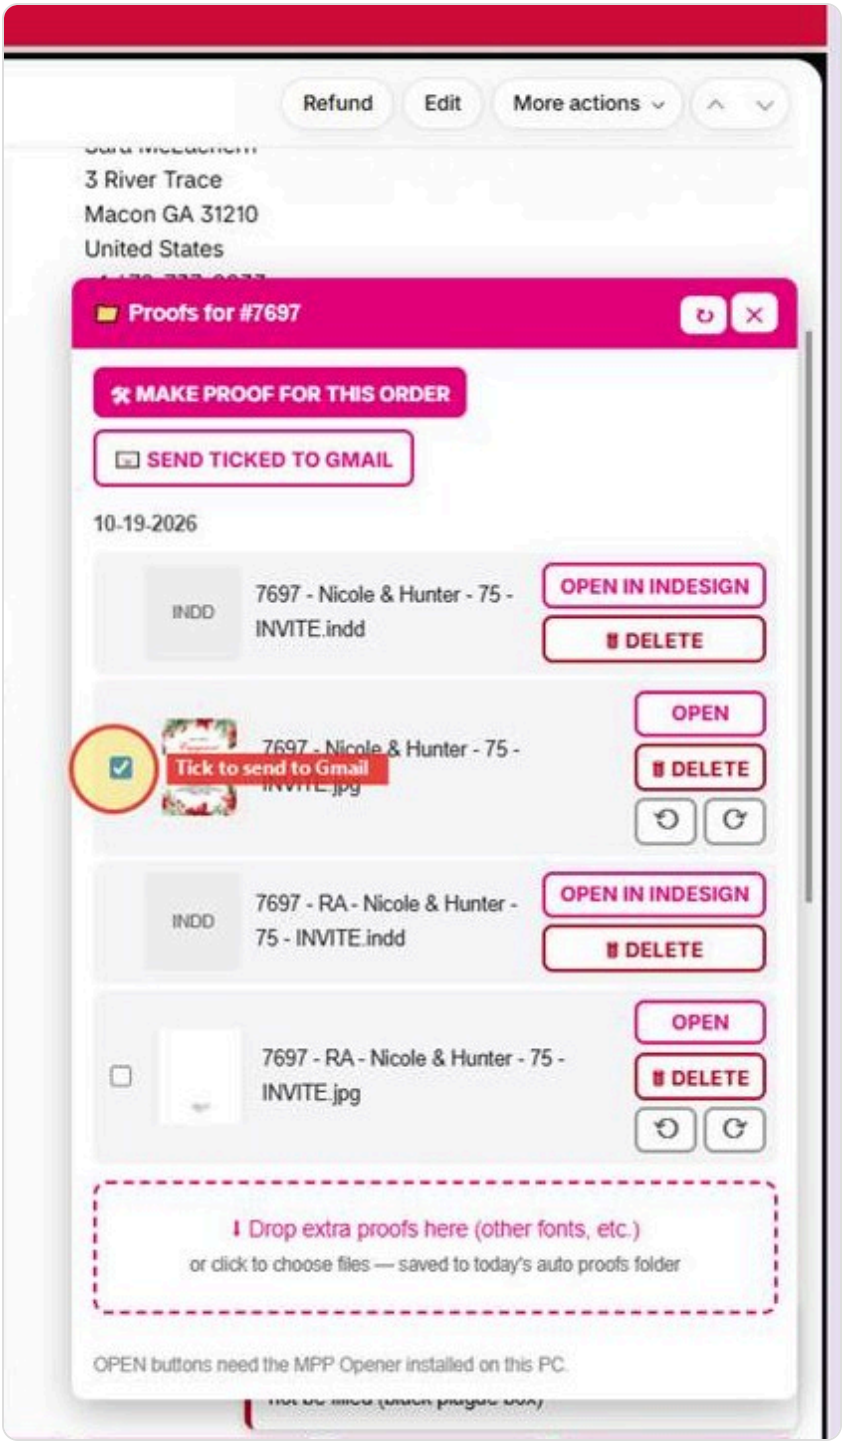

A pink box called **Proofs for #7697** opens on the right. It lists your files. You should see 4: the card INDD, the card JPG, the RA INDD, and the RA JPG. The JPGs show a tiny picture and have a check box.

If a JPG is missing, click the small round arrow ↻ at the top of the box. It looks for new files.

Click the round arrow ↻ to refresh the list.

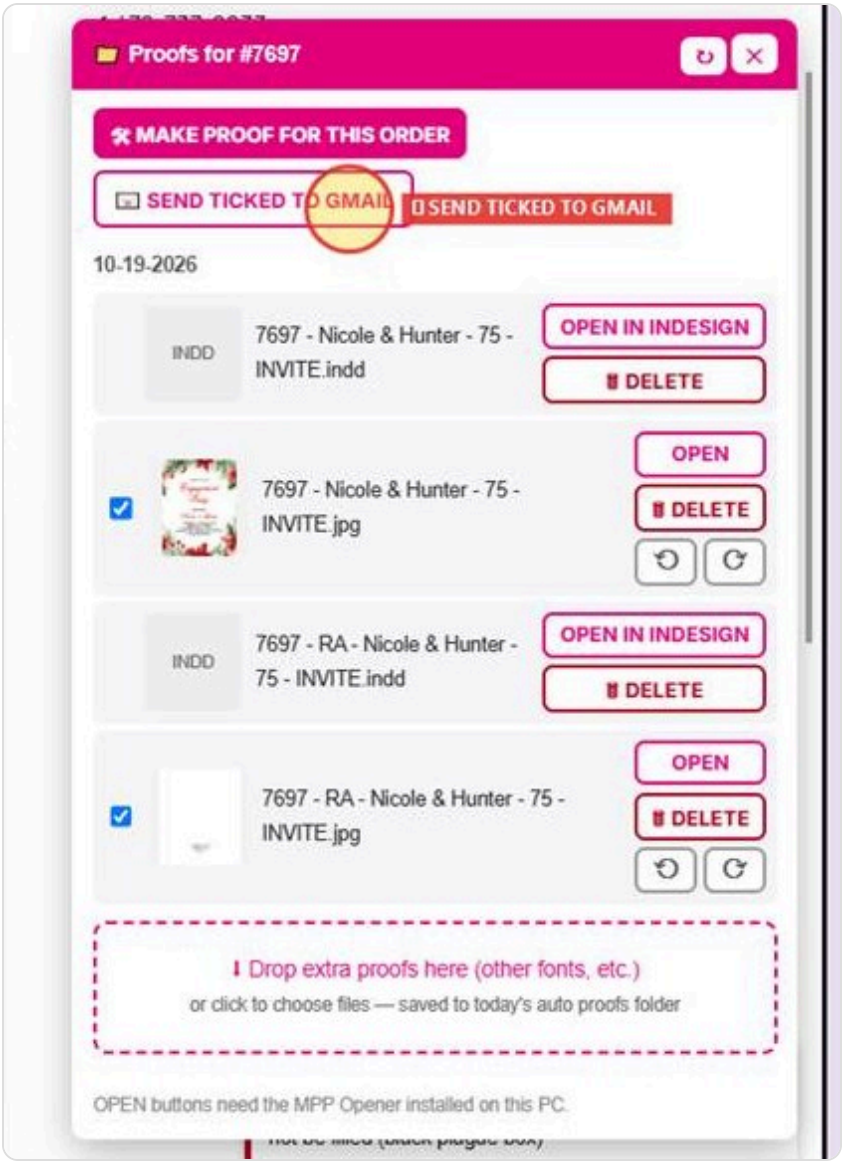

6.4 Click the **check box** next to the card **JPG**. The red label says **Tick to send to Gmail**.

Tick the card JPG.

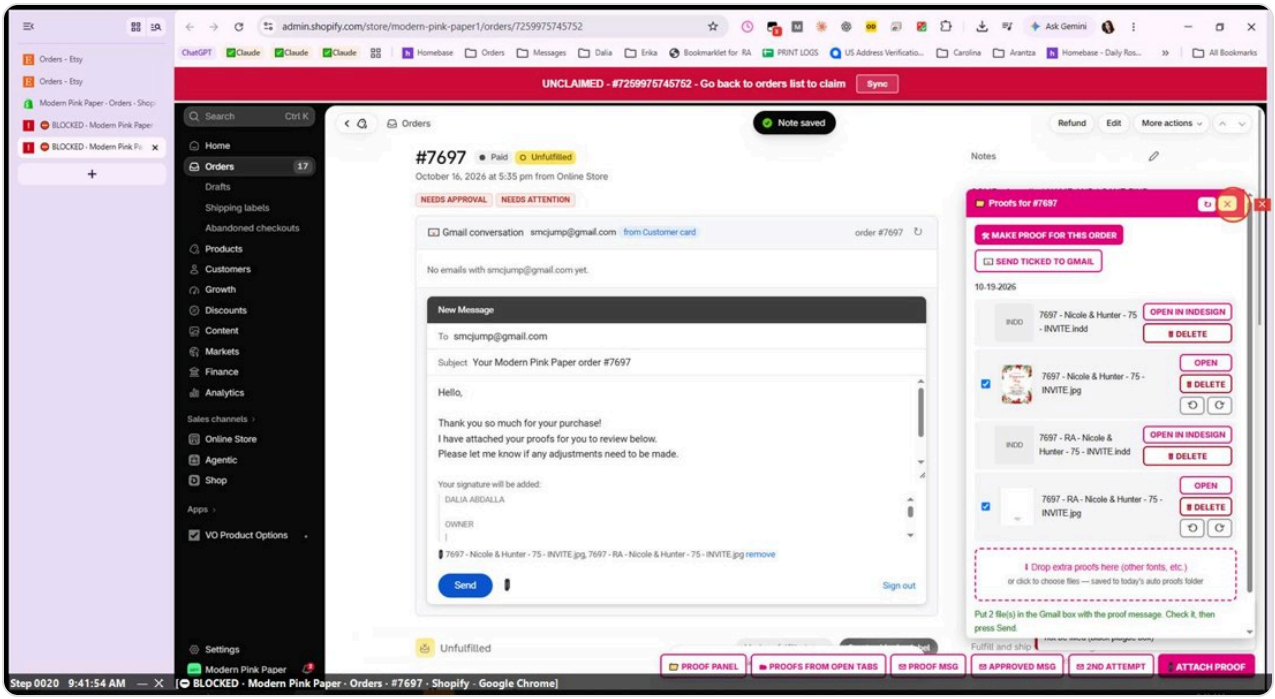

6.5 Click the check box next to the **RA JPG** too.

6.6 Click **SEND TICKED TO GMAIL**.

Both JPGs are ticked. Click **SEND TICKED TO GMAIL**.

6.7 Click the small × at the top right of the pink box to close it. The email box is now on the page.

The email is filled in for you. It has a pink box with a note: "Put 2 file(s) in the Gmail box with the proof message."

Check:

- The email box shows the customer's email address after **To**.
- The subject says **Your Modern Pink Paper order #** and the order number.
- Both JPG names show under the message, with the word **remove** next to them.

7 Send the email

Read it first. Add words if you need to.

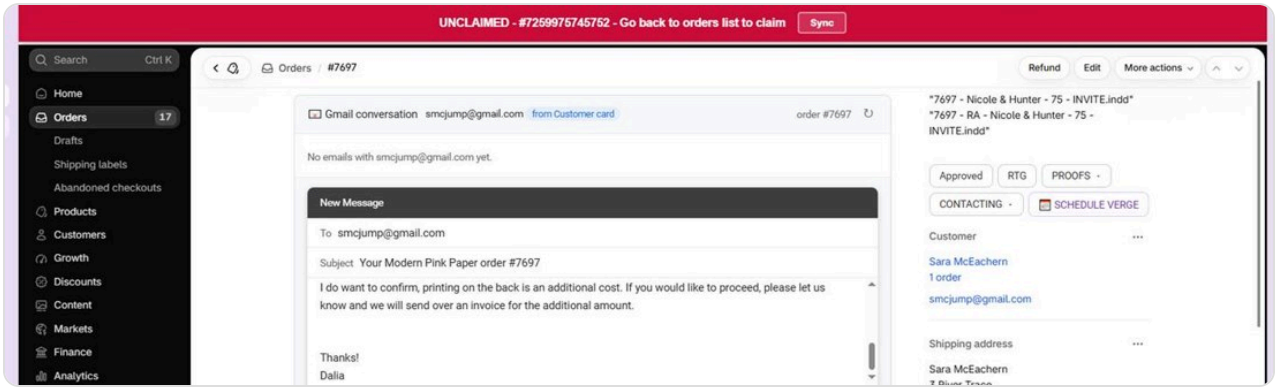

7.1 Read the message. It already says: "Thank you so much for your purchase! I have attached your proofs for you to review below. Please let me know if any adjustments need to be made." It ends with Dalia's name.

7.2 If you need to say more, click inside the message and type. In this order, Arantza added a note about the back of the card:

"I do want to confirm, printing on the back is an additional cost. If you would like to proceed, please let us know and we will send over an invoice for the additional amount."

Use words like these when the customer asks for something that costs extra, or for something you could not do.

7.3 Click the blue **Send** button.

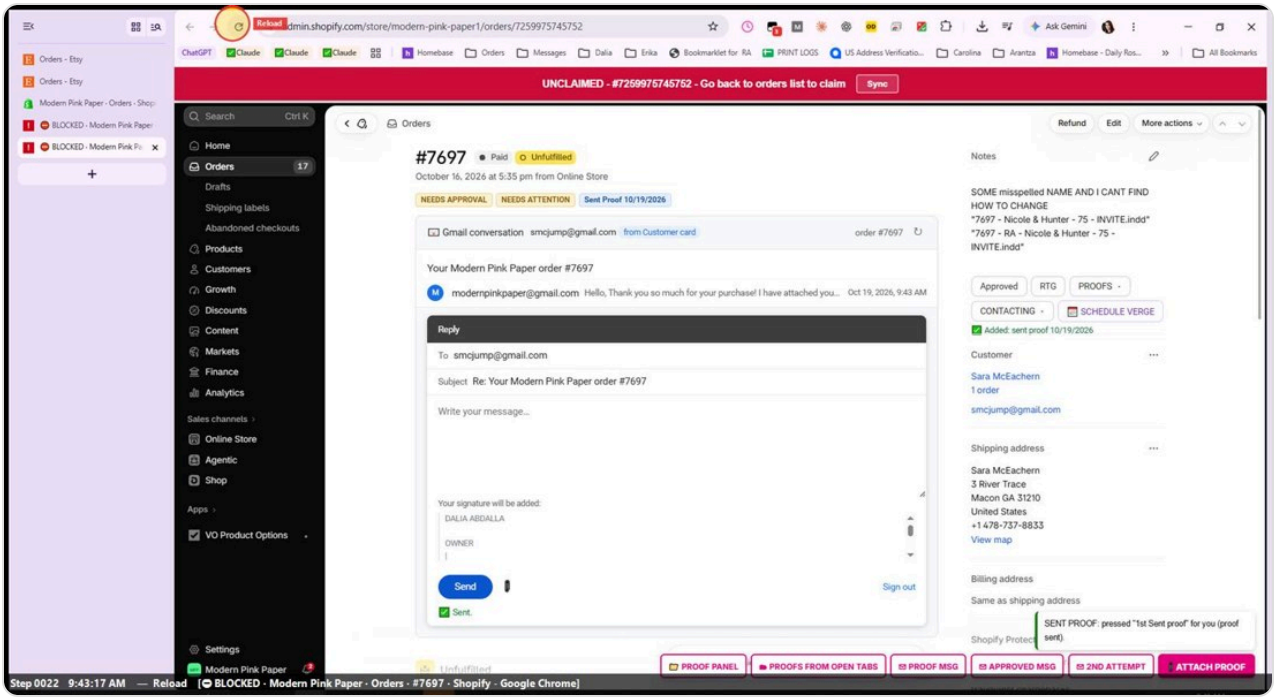

Click **Send**.

7.4 Click the **Reload** button in Chrome (the round arrow at the top left). The page loads again.

7.5 Check the page. You should see:

- A new line in the Gmail box saying the message was sent.
- A tag near the top that says **Sent Proof** and today's date.
- A note on the right: "SENT PROOF: pressed '1st Sent proof' for you (proof sent)."

The proof is sent. Look for **Sent Proof** and the date.

7.6 At the bottom right, a small note may say: **"BLOCKED in InDesign — make this proof by hand."** It can also list which fields the script could not fill. This is the script's reminder. If you already fixed those fields in Step 4, you can ignore it.

7.7 Go on to the next order. In the recording, Arantza went to order **#7698** next. Then she opened **Microsoft Teams**.

NO PICTURE The recording does not show what she wrote in Teams. Ask Dalia what to tell the team.

All done when:

- The proof email is sent.
- The **Sent Proof** tag shows on the order.
- You know what comes next: when the customer says **Approved**, the team prints the order.

If something goes wrong

WHAT YOU SEE	WHAT TO DO
The order is under BLOCKED — NO PROOF MADE	Read the red reason. If you decide to make it anyway, tick the box (step 2.1). If the reason says **"SKU (custom) needs a human"**, ask Dalia first.
The page is black and says STOP!	The script could not fill some fields. Type them in yourself and delete the black box (step 4.1).
A JPG is not in the Proofs box	Click the round arrow ↻ (step 6.3). If it still is not there, export it again (step 5.3).
The OPEN or OPEN IN INDESIGN buttons do nothing	The box says: "OPEN buttons need the MPP Opener installed on this PC." Ask Dalia to install it.
A red bar at the top says UNCLAIMED	The order has not been claimed by anyone. It was red in the recording too. Ask Dalia if you should click the claim button first.
The Gmail box does not show your pictures	Make sure the boxes next to the JPGs are ticked. Click **SEND TICKED TO GMAIL** again.
InDesign will not start the script	Close InDesign. Open it again. Wait until the Scripts panel is ready. Try step 3.3 again.

Ask Dalia before Arantza leaves

The recording was short and did not show everything. These are the gaps.

- **What Arantza typed in the card.** The recording shows the card before and after, but not the edits (step 4.5).
- **The Save As and Export boxes.** Steps 5.1 to 5.3 come from the log. Walk through them once and take pictures.
- **The script run.** The recording does not show the double-click in the Scripts panel (step 3.3).
- **Notepad.** At 9:38 she opened a blank Notepad and clicked **Format**. We do not know why. It may not be part of the job.
- **The red "UNCLAIMED" bar.** Should the order be claimed first?

- **Teams.** What to write, and to whom, after a proof goes out (step 7.7).
- **Blocked orders.** Who decides if a blocked order gets a proof? What does "needs a human" mean for custom SKUs like #7698?
- **What happens after the customer answers.** The pink buttons **APPROVED MSG**, **2ND ATTEMPT**, and **ATTACH PROOF** were not used in this recording.
- **Logins.** Shopify, Gmail, Teams, and the Chrome add-on.

Built from the MT Log SOP recording "auto proofs" (session dceec677) on Arantza's PC, Oct 19, 2026, 9:37 AM to 9:43 AM, plus her activity log. Screenshots were cropped from the recording. The red circles show where she clicked. Five small screenshots (the Windows taskbar and a Notepad menu) did not download and are not used.
