MODERN PINK PAPER · STEP-BY-STEP GUIDE

# How to list new designs on Shopify

This guide shows one person how to take a batch of new designs from "finished card" to "live on Shopify." Follow the steps in order. Do not skip any.

**Made from:** Erika's screen recording, Oct 15, 2026, 9:00 AM to 2:05 PM

**Example batch used:** MA, WTY, WI, SDI, EI, RDI, BRSI

---

## Before you start

Have these ready. You need all of them.

- A Windows computer with **Google Drive for desktop**. Your files show up as the `G:` drive.
- **Chrome**, signed in to Dalia's Google account, **Shopify** (store: modern-pink-paper1), and **Claude** (claude.ai).
- **Adobe InDesign** (the return address files open here).
- The **MPP Shopify Lister** tool. It is a small panel that appears on the Shopify Products page. This guide was written for version `v1.8.1`.
- These Google Sheets: **SKU NUMBERS FOR MODERN PINK PAPER2** and **MPP Project Tracker**. Both are saved as tabs in Chrome.
- **Microsoft Teams**, to tell Dalia when you are done.

**PASSWORDS**

No passwords are written in this guide on purpose. Ask Dalia for any login you do not have.

### Words to know

**SKU** The code for one design, like `MA043` or `WTY031`. The letters tell you the product line. The number tells you which design.

**Batch** The group of new SKUs you list together. Name it with the line letters and the date, like `MA WTY WI SDI EI RDI BRSI Oct 15 2026`.

| | |
|---|---|
| **RA** | Return address. Cards like MA and WTY print the buyer's return address. Invitations (WI, SDI, EI, RDI, BRSI) do not. |
| **Font chart** | A picture that shows the name font. You only need one when the name is written in a script font. |
| **Draft** | A Shopify listing that customers cannot see yet. |
| **Active** | A Shopify listing that customers can see and buy. |
| **Lister** | The helper panel on Shopify that builds the draft listings for you. |

# The 8 steps at a glance

**1** **Fill in the SKU sheet**
Write the fonts for each new design.

**2** **Make the photo zip**
Copy the photos into a batch folder and zip them.

**3** **Run the SEO step in Claude**
Claude writes the titles, descriptions, and tags.

**4** **Check Claude's sheet**
Read every row. Mark it Yes or Fix.

**5** **Make the Shopify drafts**
Use the MPP Shopify Lister.

**6** **Check the drafts and make them Active**
This is the step that puts them on the store.

**7** **Update the Project Tracker**
Write down what you finished.

**8** **Tell Dalia**
Send a short message in Teams.

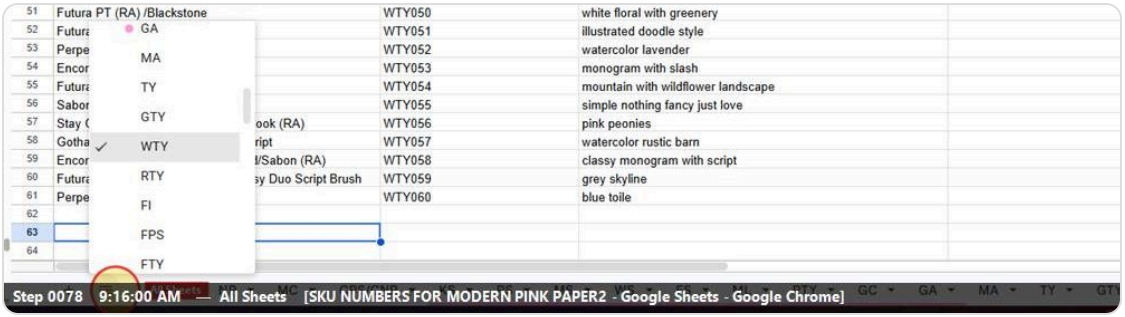

# 1 Fill in the SKU sheet

Time to write down the fonts for every new design.

Claude cannot see fonts in a picture very well. You tell it the fonts by typing them in the SKU sheet. Do this for every new SKU in the batch.

**1.1** Open Chrome. Click the tab **SKU NUMBERS FOR MODERN PINK PAPER2**.

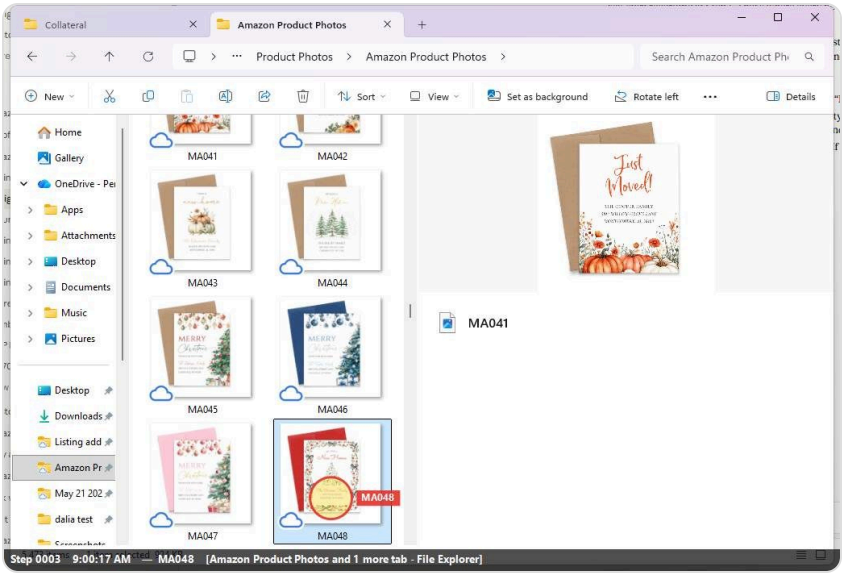

**1.2** Look at the tabs at the bottom. There is one tab for each product line (MA, WTY, WI, SDI, EI, RDI, BRSI, and more). Click the tab for your line. If you cannot see it, click the **All Sheets** button in the bottom left corner. It shows the full list.

The **All Sheets** list. Pick your line from it.

**1.3** Scroll down to the new SKUs. They are at the bottom of the list.

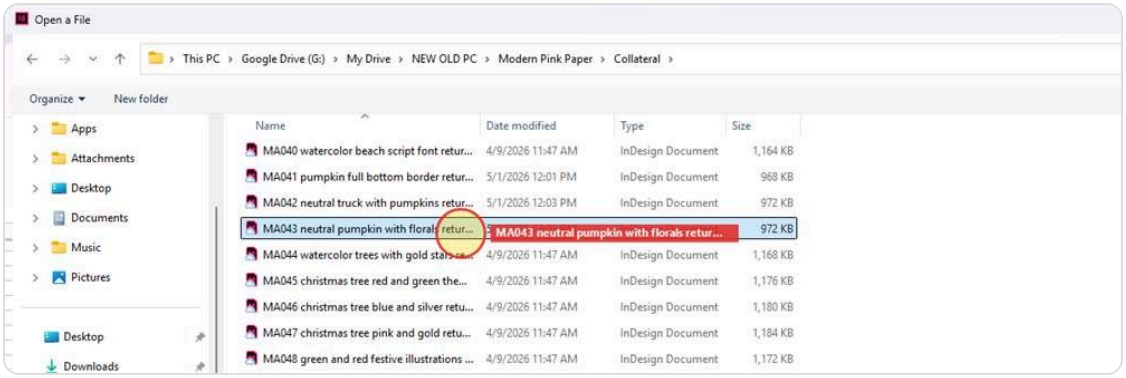

**1.4** See the design. Open **File Explorer**. Click the pinned folder **Amazon Product Photos**. Click the picture with the same SKU name.

Each photo is named with its SKU.

**1.5** For MA and WTY cards, open the return address file in InDesign to see the fonts.

- Open **InDesign**. Click **File**, then **Open**.
- Go to `Google Drive (G:) › My Drive › NEW OLD PC › Modern Pink Paper › Collateral`.
- Click the file that starts with your SKU. Example: `MA043 neutral pumpkin with florals return address`. Click **Open**.

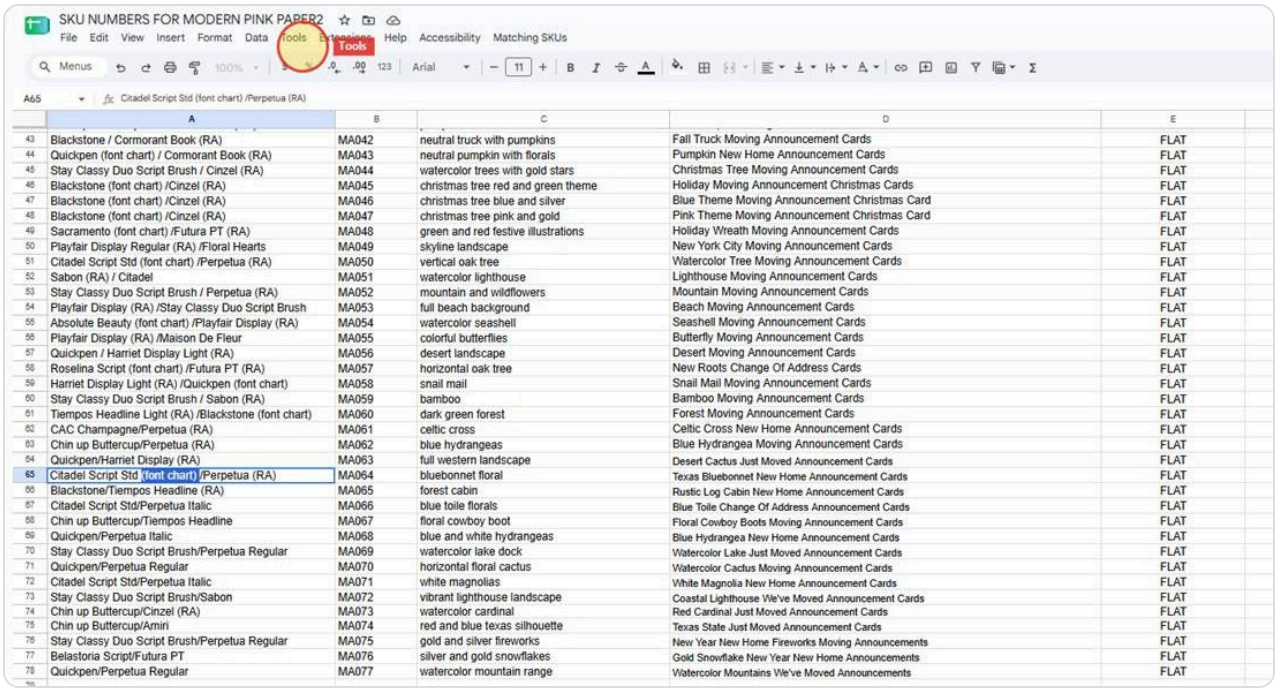

Pick the file that starts with the SKU.

Invitation SKUs (WI, SDI, EI, RDI, BRSI) have no return address. Their files are in the **Invites** folder, in a folder for each type. Example: Invites › Rehearsal Dinner.

**1.6** Go back to the SKU sheet. Click the **Column A** cell for your SKU. Type the fonts like this:

- Put `(RA)` right after the return address font.
- Put `(font chart)` right after the name font, but **only if the name is in a script font**.
- Invitations do not get `(RA)`.

Example: `Quickpen (font chart) / Cormorant Book (RA)`

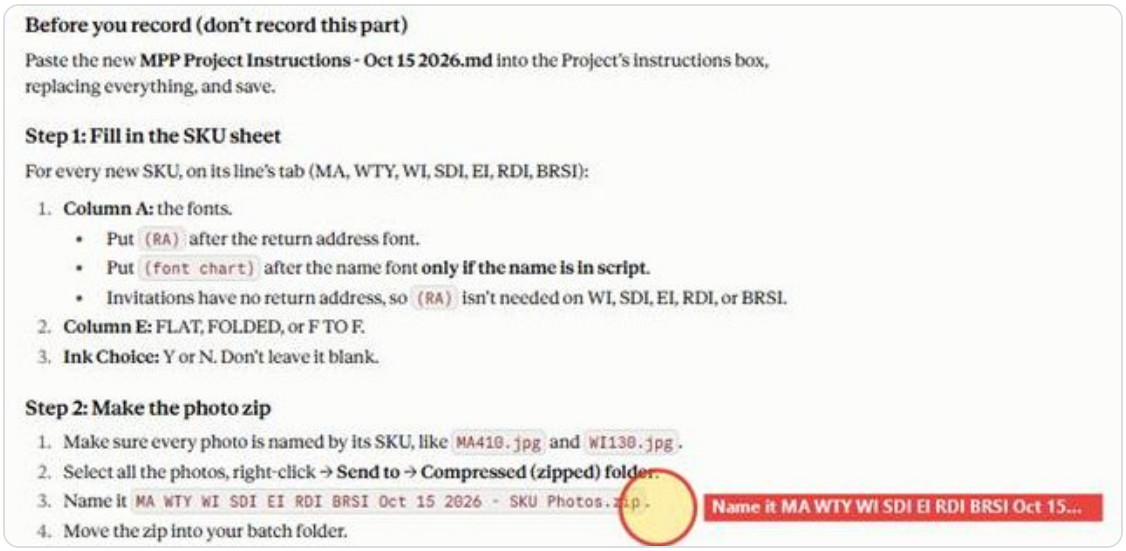

| | A | B | C | D | E |
|---|---|---|---|---|---|
| 43 | Blackstone / Cormorant Book (RA) | MA042 | neutral truck with pumpkins | Fall Truck Moving Announcement Cards | FLAT |
| 44 | Quickpen (font chart) / Cormorant Book (RA) | MA043 | neutral pumpkin with florals | Pumpkin New Home Announcement Cards | FLAT |
| 45 | Stay Classy Duo Script Brush / Cinzel (RA) | MA044 | watercolor trees with gold stars | Christmas Tree Moving Announcement Cards | FLAT |
| 46 | Blackstone (font chart) /Cinzel (RA) | MA045 | christmas tree red and green theme | Holiday Moving Announcement Christmas Cards | FLAT |
| 47 | Blackstone (font chart) /Cinzel (RA) | MA046 | christmas tree blue and silver | Blue Theme Moving Announcement Christmas Card | FLAT |
| 48 | Blackstone (font chart) /Cinzel (RA) | MA047 | christmas tree pink and gold | Pink Theme Moving Announcement Christmas Card | FLAT |
| 49 | Sacramento (font chart) /Futura PT (RA) | MA048 | green and red festive illustrations | Holiday Wreath Moving Announcement Cards | FLAT |
| 50 | Playfair Display Regular (RA) /Floral Hearts | MA049 | skyline landscape | New York City Moving Announcement Cards | FLAT |
| 51 | Citadel Script Std (font chart) /Perpetua (RA) | MA050 | vertical oak tree | Watercolor Tree Moving Announcement Cards | FLAT |
| 52 | Sabon (RA) / Citadel | MA051 | watercolor lighthouse | Lighthouse Moving Announcement Cards | FLAT |
| 53 | Stay Classy Duo Script Brush / Perpetua (RA) | MA052 | mountain and wildflowers | Mountain Moving Announcement Cards | FLAT |
| 54 | Playfair Display (RA) /Stay Classy Duo Script Brush | MA053 | full beach background | Beach Moving Announcement Cards | FLAT |
| 55 | Absolute Beauty (font chart) /Playfair Display (RA) | MA054 | watercolor seashell | Seashell Moving Announcement Cards | FLAT |
| 56 | Playfair Display (RA) /Maison De Fleur | MA055 | colorful butterflies | Butterfly Moving Announcement Cards | FLAT |
| 57 | Quickpen / Harriet Display Light (RA) | MA056 | desert landscape | Desert Moving Announcement Cards | FLAT |
| 58 | Roselina Script (font chart) /Futura PT (RA) | MA057 | horizontal oak tree | New Roots Change Of Address Cards | FLAT |
| 59 | Harriet Display Light (RA) /Quickpen (font chart) | MA058 | snail mail | Snail Mail Moving Announcement Cards | FLAT |
| 60 | Stay Classy Duo Script Brush / Sabon (RA) | MA059 | bamboo | Bamboo Moving Announcement Cards | FLAT |
| 61 | Tiempos Headline Light (RA) /Blackstone (font chart) | MA060 | dark green forest | Forest Moving Announcement Cards | FLAT |
| 62 | CAC Champagne/Perpetua (RA) | MA061 | celtic cross | Celtic Cross New Home Announcement Cards | FLAT |
| 63 | Chin up Buttercup/Perpetua (RA) | MA062 | blue hydrangeas | Blue Hydrangea Moving Announcement Cards | FLAT |
| 64 | Quickpen/Harriet Display (RA) | MA063 | full western landscape | Desert Cactus Just Moved Announcement Cards | FLAT |
| 65 | Citadel Script Std (font chart) /Perpetua (RA) | MA064 | bluebonnet floral | Texas Bluebonnet New Home Announcement Cards | FLAT |
| 66 | Blackstone/Tiempos Headline (RA) | MA065 | forest cabin | Rustic Log Cabin New Home Announcement Cards | FLAT |
| 67 | Citadel Script Std/Perpetua Italic | MA066 | blue toile florals | Blue Toile Change Of Address Announcement Cards | FLAT |
| 68 | Chin up Buttercup/Tiempos Headline | MA067 | floral cowboy boot | Floral Cowboy Boots Moving Announcement Cards | FLAT |
| 69 | Quickpen/Perpetua Italic | MA068 | blue and white hydrangeas | Blue Hydrangea New Home Announcement Cards | FLAT |
| 70 | Stay Classy Duo Script Brush/Perpetua Regular | MA069 | watercolor lake dock | Watercolor Lake Just Moved Announcement Cards | FLAT |
| 71 | Quickpen/Perpetua Regular | MA070 | horizontal floral cactus | Watercolor Cactus Moving Announcement Cards | FLAT |
| 72 | Citadel Script Std/Perpetua Italic | MA071 | white magnolias | White Magnolia New Home Announcement Cards | FLAT |
| 73 | Stay Classy Duo Script Brush/Sabon | MA072 | vibrant lighthouse landscape | Coastal Lighthouse We've Moved Announcement Cards | FLAT |
| 74 | Chin up Buttercup/Cinzel (RA) | MA073 | watercolor cardinal | Red Cardinal Just Moved Announcement Cards | FLAT |
| 75 | Chin up Buttercup/Amiri | MA074 | red and blue texas silhouette | Texas State Just Moved Announcement Cards | FLAT |
| 76 | Stay Classy Duo Script Brush/Perpetua Regular | MA075 | gold and silver fireworks | New Year New Home Fireworks Moving Announcements | FLAT |
| 77 | Belastoria Script/Futura PT | MA076 | silver and gold snowflakes | Gold Snowflake New Year New Home Announcements | FLAT |
| 78 | Quickpen/Perpetua Regular | MA077 | watercolor mountain range | Watercolor Mountains We've Moved Announcements | FLAT |

Column A holds the fonts. Column E holds FLAT, FOLDED, or F TO F.

**1.7** In **Column E**, type `FLAT`, `FOLDED`, or `F TO F`. Pick the one that matches the card.

**1.8** Fill in **Ink Choice** with `Y` or `N`. Never leave it blank.

> **TIP**
>
> The Claude chat called **Design words and product titles** has these same rules written out. Open it if you forget one.

**Before you record (don't record this part)**

Paste the new **MPP Project Instructions - Oct 15 2026.md** into the Project's instructions box, replacing everything, and save.

**Step 1: Fill in the SKU sheet**

For every new SKU, on its line's tab (MA, WTY, WI, SDI, EI, RDI, BRSI):

1. **Column A:** the fonts.
   - Put `(RA)` after the return address font.
   - Put `(font chart)` after the name font **only if the name is in script.**
   - Invitations have no return address, so `(RA)` isn't needed on WI, SDI, EI, RDI, or BRSI.
2. **Column E:** FLAT, FOLDED, or F TO F.
3. **Ink Choice:** Y or N. Don't leave it blank.

**Step 2: Make the photo zip**

1. Make sure every photo is named by its SKU, like `MA410.jpg` and `WI130.jpg`.
2. Select all the photos, right-click → **Send to** → **Compressed (zipped) folder.**
3. Name it `MA WTY WI SDI EI RDI BRSI Oct 15 2026 - SKU Photos.zip`.
4. Move the zip into your batch folder.

Claude's own written reminder for Steps 1 and 2.

> **Check yourself**
>
> - Every new SKU has fonts in Column A.
> - Column E and Ink Choice are not blank.

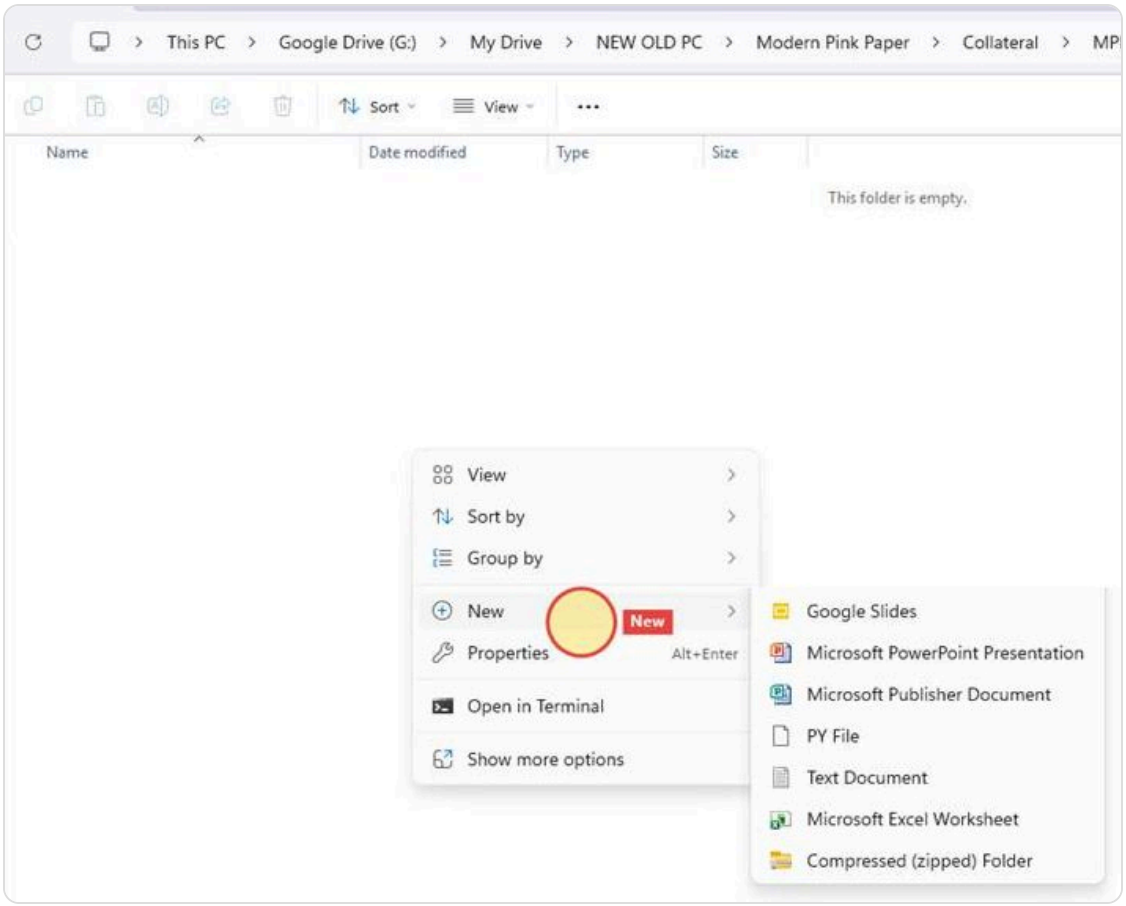

# 2 Make the photo zip

One zip file with a photo for every SKU in the batch.

Claude and the Lister both read this zip. Every photo must be named with its SKU, like `MA041.jpg` or `WI130.jpg`.

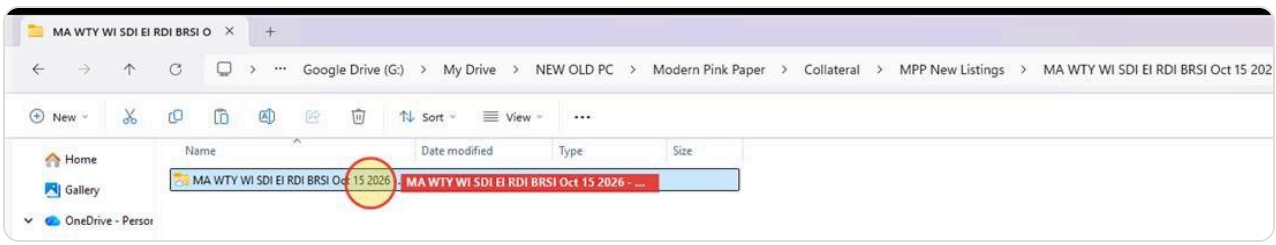

**2.1** Open **File Explorer**. Go to `Google Drive (G:) › My Drive › NEW OLD PC › Modern Pink Paper › Collateral › MPP New Listings`.

**2.2** Right-click an empty spot. Click **New**, then **Folder**. Name the folder with your batch name. Example: `MA WTY WI SDI EI RDI BRSI Oct 15 2026`

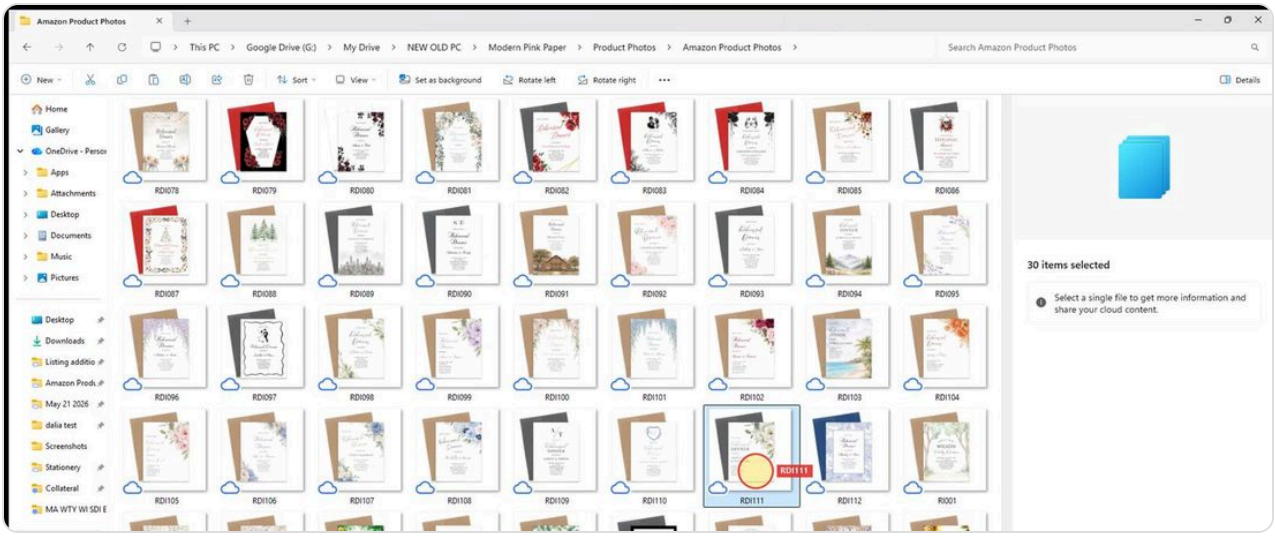

Right-click, then **New**.

**2.3** Open the new folder. Make one more folder inside it. Name it the same thing and add `- SKU Photos` at the end.

The batch folder holds the **SKU Photos** folder.

**2.4** Go back to the **Amazon Product Photos** folder. Click the first photo of your batch. Hold `Ctrl` and click each of the other photos. Press `Ctrl + C` to copy.

Here 30 photos are selected. The panel on the right says "30 items selected."

**2.5** Open your **SKU Photos** folder. Press `Ctrl + V` to paste. Count the photos. The number must match the number of SKUs.

**2.6** Press `Ctrl + A` to select every photo. Right-click one. Click **Send to**, then **Compressed (zipped) folder**.

**2.7** Name the zip like this: `MA WTY WI SDI EI RDI BRSI Oct 15 2026 - SKU Photos.zip`. Move the zip into the batch folder (one level up).

### Check yourself

- The zip is in the batch folder.
- The photo count equals the SKU count.
- Every photo is named with its SKU.

# 3 Run the SEO step in Claude

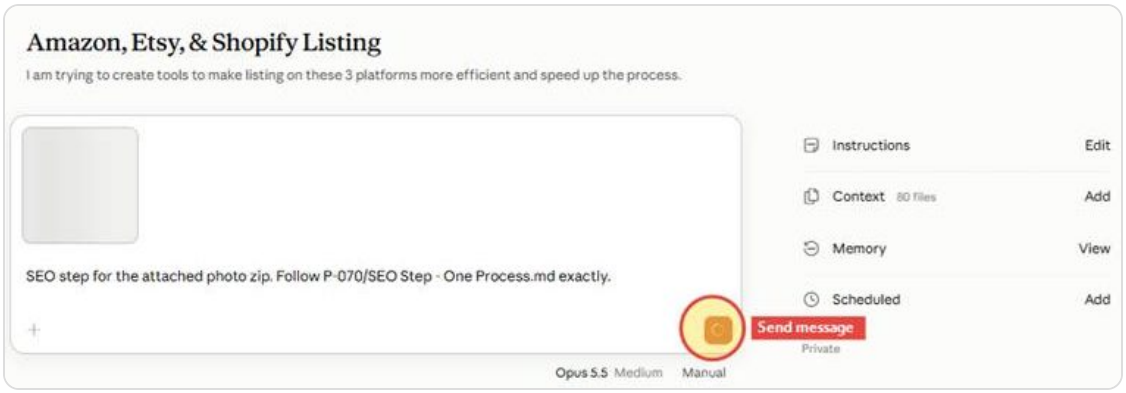

Claude writes the titles, descriptions, tags, and keywords.

**3.1** Open Chrome and go to **claude.ai**. In the left list, click **Projects**, then the project **Amazon, Etsy, & Shopify Listing**.

**3.2** Attach the zip from Step 2. Click the **+** in the message box and pick the file. Then paste this sentence exactly:

```
SEO step for the attached photo zip. Follow P-070/SEO Step - One Process.md exactly.
```

Click the orange **Send message** button.

The zip is attached, the sentence is typed. Now click **Send message**.

**3.3** If the batch is big, Claude may ask how to split it. Pick the one marked **(Recommended)**. Claude's rule is about **50 SKUs per chat**.

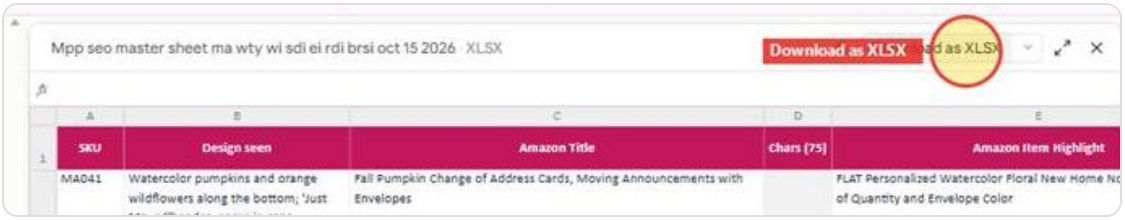

Example: 154 SKUs, so Claude suggests 3 chats.

In the recording, the batch had 154 SKUs. Dalia said a batch that big is not normal. She wanted to see if Claude could handle it.

**3.4** Wait. The **Progress** box on the right shows what Claude is doing. It can take 5 minutes or more. Do something else, then come back.

**3.5** When Claude is done, you will see a file card named **MPP SEO Master Sheet**. Click it to open the preview. Click **Download as XLSX** in the top right corner. The file goes to your **Downloads** folder.

Click **Download as XLSX**.

If Claude used more than one chat, it will give you one sheet per chat, then one merged sheet. Use the **merged** sheet for the next steps.

**3.6** Copy the downloaded file into your batch folder, next to the zip.

**Check yourself**

- Claude's note says the rule checker found **0 errors**.
- Claude says every photo matched a row.

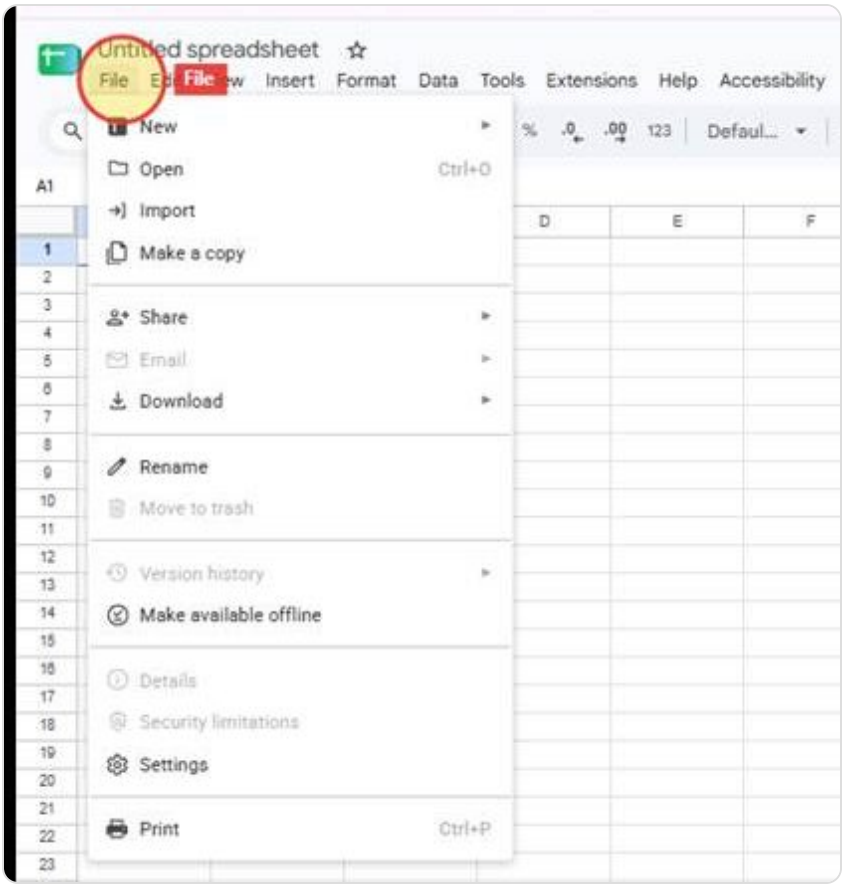

# 4 Check Claude's sheet

You are the editor. Claude can make mistakes. Read every row.

## Open the sheet in Google Sheets

**4.1** In Chrome, open a new blank Google Sheet. It is called **Untitled spreadsheet**.

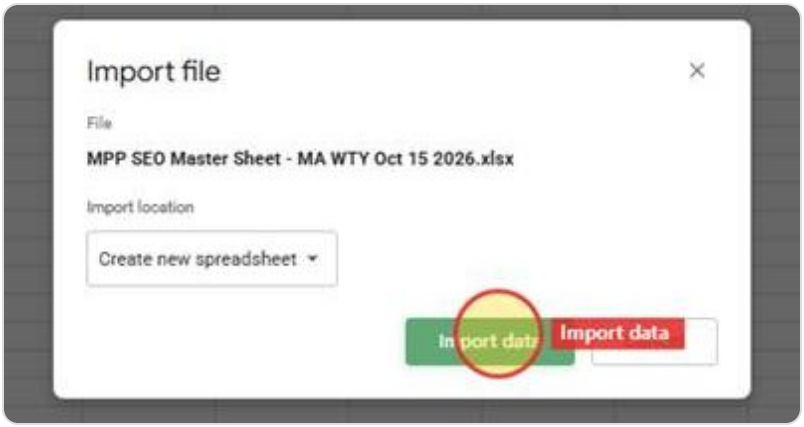

**4.2** Click **File**, then **Import**.

File menu. Choose **Import**.

**4.3** Click **Upload** (or **Browse**). Pick the `.xlsx` file from your Downloads folder.

4.4 Leave **Import location** as **Create new spreadsheet**. Click **Import data**. Then click **Open now**.

Click **Import data**.

## Read and mark every row

4.5 Each row is one SKU. Read these columns on every row: **Design seen**, **Shopify Page Title**, **Meta Description**, **Shopify Description**, **Shopify Tags**, and **Keywords used**.

4.6 Ask yourself these questions:

- Does the title sound like a real title? A title that is just a pile of design words is wrong.
- Do the words match the card in the picture? A word for something that is not on the card is wrong.
- Is the description easy to read?

Real notes Erika wrote on this day: "shopify title doesn't sound like a complete title" and "eucalyptus should not be included in the title or item highlight for this design."

4.7 Scroll right to the yellow column **Approved?**. Click the cell. Pick one:

- **Yes**: the row is good.
- **Fix**: the row needs a change. Type what to change, and why, in the **Notes** cell next to it.
- **No**: do not list this one.

The **Approved?** dropdown has Yes, Fix, and No.

4.8 If any cell is yellow or orange, fill it in.

**4.9** Save the sheet as a file. Click **File**, then **Download**, then **Microsoft Excel (.xlsx)**. Put the file in your batch folder.

## If any row says Fix

**4.10** Go back to the **same Claude chat**. Attach the sheet you just saved. Tell Claude to fix the rows marked Fix. You can also type a rule in the chat. Example from the recording: "if hand drawn is search then keep it."

**4.11** Claude may ask you a question first. Answer it. Then wait. Download the new XLSX.

**4.12** Open the new file. Check the rows again. Repeat until **every row you want listed says Yes**.

**IMPORTANT**

The Lister only reads rows that say **Yes**. A row that is blank, Fix, or No will not be listed.

**Check yourself**

- Every row you want has Yes.
- You saved the final file as .xlsx in the batch folder.

# 5 Make the Shopify drafts

The MPP Shopify Lister builds each listing as a draft.

**GOOD TO KNOW**

The screen recording stopped before Erika clicked **Make 1 draft** and **Make all drafts**. Steps 5.7 to 5.9 come from the written steps in Claude's chat **SEO and Shopify listing process**. The screenshots for 5.1 to 5.6 are from the recording.

## Open the Lister and load your files

**5.1** In Chrome, open Shopify. Go to **Products**. The address is `admin.shopify.com/store/modern-pink-paper1/products`.

**5.2** Look at the bottom right corner. Click the blue **MPP Shopify Lister** button. A panel opens. The title must say `v1.8.1`.

The button.

The panel. It has numbered buttons 1 to 5.

**5.3** **One-time check.** Click the little arrow next to **Settings**. The **Source SKUs** box must have a line like `WTY=WTY030`. If it only has `FI=FI043`, paste the full list from the file `P-070/Shopify Source SKUs.md`. Click **Save settings**.

**5.4** Click **1. Load MPP SEO Master Sheet (.xlsx)**. Pick your final file. The panel tells you how many rows are approved. Example: *"22 approved of 22 rows."*

If the first number is smaller, some rows are not marked Yes.

**5.5** Click **2. Load photo zip**. Pick your SKU Photos zip. The panel says how many photos it found.

Look at the two lines under it. **RA photos** and **font charts** must each say *(saved)*. If one does not, click its button and pick the file. They are named `MPP RA Photos - Master.zip` and `MPP Font Charts - Master.zip`. You only do this once.

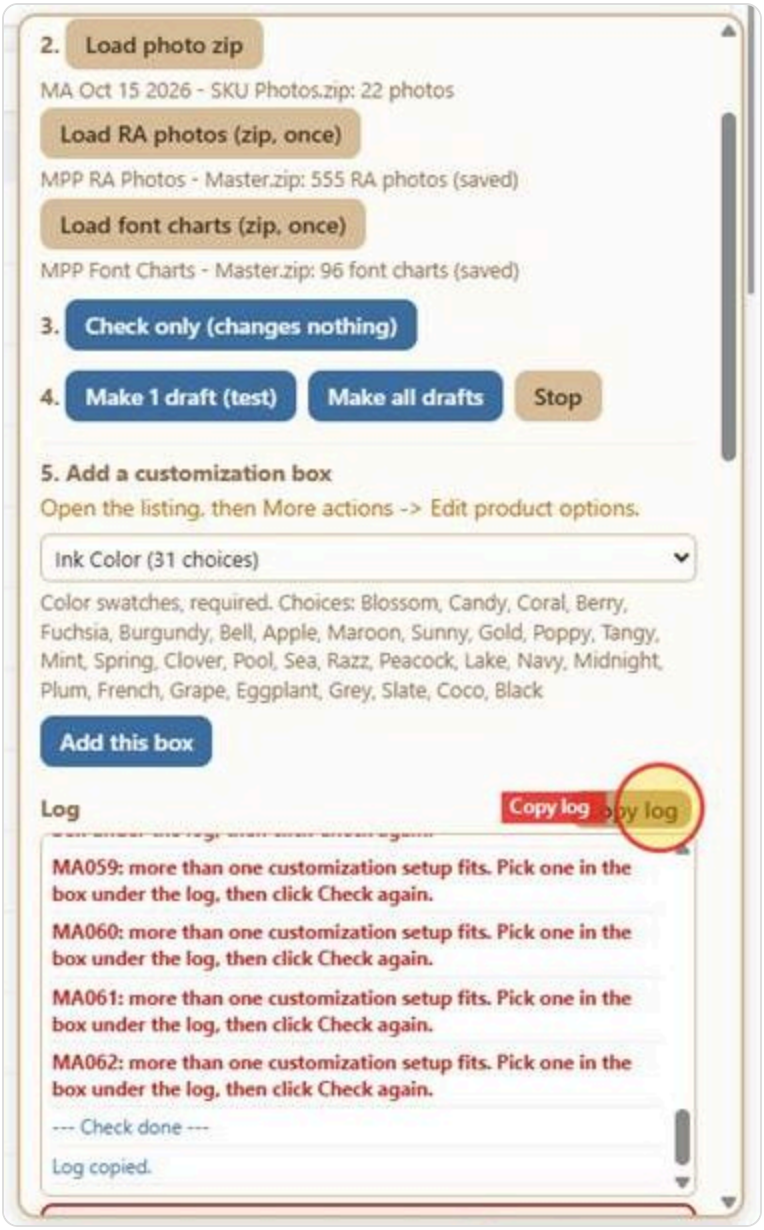

## Check, then build

**5.6** Click **3. Check only (changes nothing)**. This does not touch Shopify. It reads the log. Read every line in the **Log** box:

- **Green** means ready.
- **Orange** means read the note.
- **Red** means stop and fix it.

The log after clicking **Check only**.

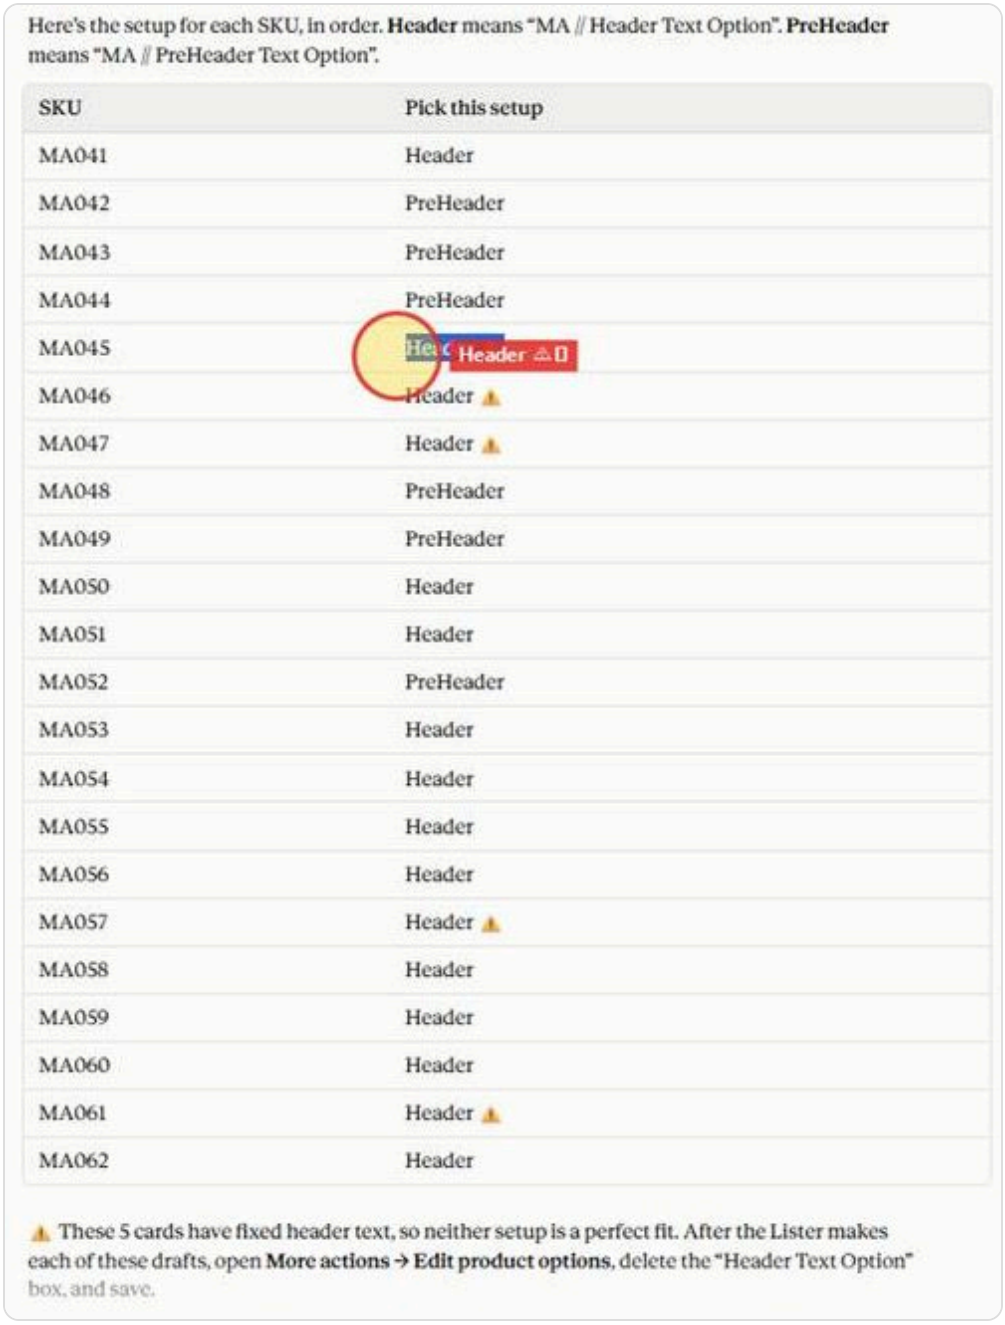

Red lines: "more than one customization setup fits." Pick one in the box under the log, then click **Check only** again.

**MA cards have two setups.** A pick box shows up for each MA SKU. Look at the top line printed on the card:

- Says *Just Moved, We've Moved,* or *I've Moved*: pick **MA // Header Text Option**.
- Says *I have a new home* or *We have a new home*: pick **MA // PreHeader Text Option**.
- Top line is fixed text, like *Merry Christmas from our new home*: pick either one. After the draft is made, open the draft, click **More actions**, then **Edit product options**, delete the header box, and save.

Claude gives you a table that lists the right setup for each SKU. Use it.

Here's the setup for each SKU, in order. **Header** means "MA // Header Text Option". **PreHeader** means "MA // PreHeader Text Option".

| SKU | Pick this setup |
|---|---|
| MA041 | Header |
| MA042 | PreHeader |
| MA043 | PreHeader |
| MA044 | PreHeader |
| MA045 | Header ⚠ 0 |
| MA046 | Header ⚠ |
| MA047 | Header ⚠ |
| MA048 | PreHeader |
| MA049 | PreHeader |
| MA050 | Header |
| MA051 | Header |
| MA052 | PreHeader |
| MA053 | Header |
| MA054 | Header |
| MA055 | Header |
| MA056 | Header |
| MA057 | Header ⚠ |
| MA058 | Header |
| MA059 | Header |
| MA060 | Header |
| MA061 | Header ⚠ |
| MA062 | Header |

⚠ These 5 cards have fixed header text, so neither setup is a perfect fit. After the Lister makes each of these drafts, open **More actions → Edit product options**, delete the "Header Text Option" box, and save.

Claude's table for the MA cards in this batch. The warning mark means the card has fixed header text.

**WTY cards** need the **Source SKUs** box from 5.3. The Lister copies the listing from WTY030.

**5.7** Click **4. Make 1 draft (test)**. In the log, click **open** to see the draft. Check the title, description, photos, and tags. The photo order is: main photo first, then the return address photo, then a font chart if the card has one. Click **Preview** and check the customization boxes.

**5.8** If the test draft looks right, click **Make all drafts**. If a SKU is already on Shopify, the Lister skips it by itself. Click **Stop** if you need to stop it.

**5.9** **Fix the odd ones.** Some SKUs need an extra box. Open the draft. Click **More actions**, then **Edit product options**. In the Lister panel, find **5. Add a customization box**. Pick the box from the list. Click **Add this box**. Look it over. Click **Save**.

In this batch the odd ones were:

- WTY053, WTY055, WTY058: add **Ink Color for Text**.
- WTY051: add **Ink Color for Border and Text**.
- WTY044, WTY053, WTY058: add **2 Letters for Monogram**.

The log warns you about these when you click **Check only**.

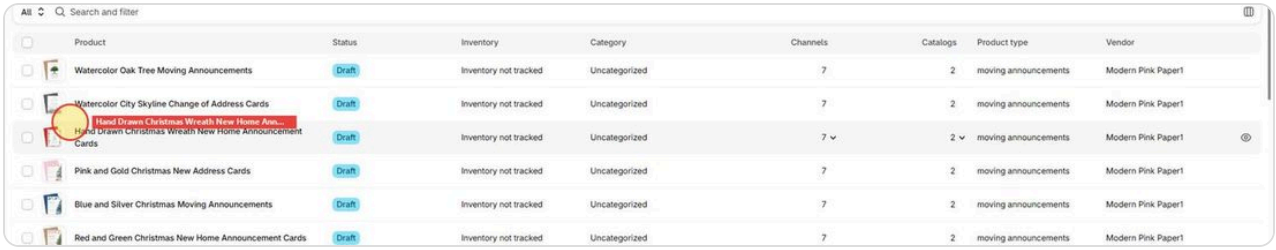

**Check yourself**

- The log has no red lines.
- You looked at the test draft before you made all of them.
- Every odd SKU has its extra box.

# 6 Check the drafts and make them Active

This is the last step before customers can see the listings.

**6.1** On the Shopify **Products** page, press `F5` to reload. Your new listings show **Draft** in the Status column.

New listings show as **Draft**.

**6.2** Open each draft and preview it. Check the title, photos, and options. Fix anything wrong before you go on.

**6.3** Go back to the Products list. Click the check box next to each draft from this batch. The top of the list says how many are selected. Example: *22 selected*. Click **Set as active**.

Select the drafts, then click **Set as active**.

**6.4** A box asks *"Set 22 products as active?"* Make sure the number is right. Click **Set as active**.

The last click. The listings are now live.

**CAREFUL**

Do not click **Set as active** until you have looked at every draft. Once they are active, customers can buy them.

**Check yourself**

- The Status column says **Active** for every listing in the batch.

# 7 Update the Project Tracker

Write down what you did so everyone can see.

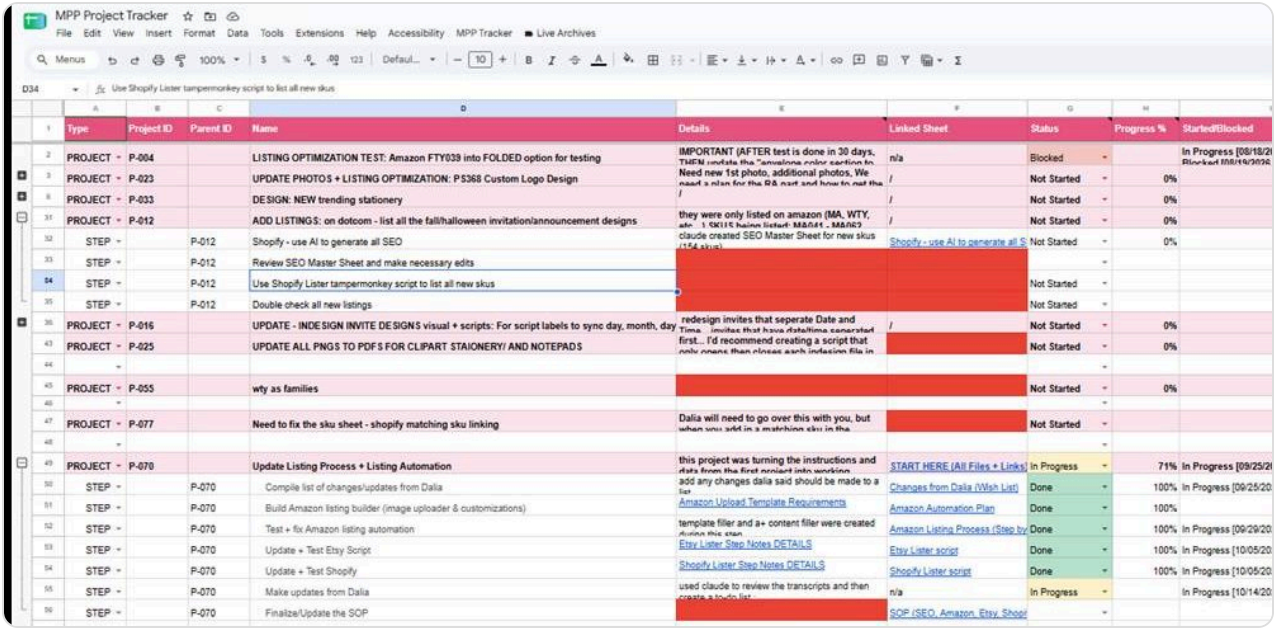

**7.1** In Chrome, click the tab **MPP Project Tracker**.

**7.2** Find the project for this work. In the recording it was **P-012**, *ADD LISTINGS: on dotcom*. The steps for a project sit under it.

**7.3** Right-click a row. Click **Insert 1 row below**. In the **Type** column, open the dropdown and pick **STEP**. Type the project number ( `P-012` ) in **Parent ID**.

**7.4** In **Name**, write the step you did. Erika's four steps for this project were:

- Shopify: use AI to generate all SEO
- Review SEO Master Sheet and make necessary edits
- Use Shopify Lister tampermonkey script to list all new SKUs
- Double check all new listings

Four STEP rows under **P-012**.

**7.5** Set the **Status** for each step (for example Done or In Progress).

# 8 Tell Dalia

A short message so she knows the batch is live.

**8.1** Open **Microsoft Teams**. Open the chat with Dalia.

**8.2** Write a short note. Say which SKUs went live, and tell her about anything odd. Press `Ctrl + Enter` to send.

That is the whole job. Amazon and Etsy have their own Listers. They are not part of this guide.

# If something goes wrong

| WHAT YOU SEE | WHAT TO DO |
|---|---|
| **A red line in the Lister log** | Stop. Read the line. Fix the problem. Click **Check only** again. |
| **"More than one customization setup fits"** | Pick one setup in the box under the log. Click **Check only** again. See step 5.6. |
| **The Lister says fewer rows approved than rows loaded** | Some rows are not marked **Yes**. Go back to the sheet in Step 4. |
| **RA photos or font charts do not say (saved)** | Click that button and load the Master zip. You only do this once. |
| **Claude's sheet has yellow or orange cells** | Fill them in yourself (step 4.8). |
| **The Shopify tab is slow or Chrome says "High memory usage"** | Reload the tab with `F5`. Erika reloaded it often during the recording. |
| **Claude wants to split the batch** | Pick the **Recommended** choice. Use the merged sheet at the end. |
| **You cannot find the Lister button** | Tell Dalia. The Lister is a Tampermonkey script in Chrome and may be turned off. |

# Ask Dalia before Erika leaves

The recording did not show everything. These are the gaps.

- **How to read a font name in InDesign.** The recording shows Erika opening the file, then typing the fonts in the sheet. It does not show how she read them.
- **How to choose the batch.** Who decides which SKUs go in a batch, and how many.
- **The Lister's draft buttons.** The recording ended before Make 1 draft and Make all drafts. Step 5.7 to 5.9 are from Claude's written steps.
- **The Settings box.** Where the file `P-070/Shopify Source SKUs.md` lives.
- **The Teams message.** What to write, and any other person to tell.
- **Logins.** Google, Shopify, Claude, Teams, and Tampermonkey.
- **The rules inside Claude.** The SEO rules live in the Claude project **Amazon, Etsy, & Shopify Listing**, in a file called `SEO Step - One Process.md`. This guide does not repeat them.

---

Built from the MT Log SOP recording "Listing Process for Shopify/Dotcom" (session 09155259) on Erika's PC, plus the written steps visible in Claude on that screen. Screenshots were cropped from the recording. The red circle in each picture is where Erika clicked.
